History of Brown University

The first suggestion of establishing a college in Rhode Island is connected with the residence of Dean (afterwards Bishop) Berkeley at Newport in 1729-31. But his cherished scheme of planting a Christian college in America failed to enlist royal favor, and the colony was compelled to wait a generation for the founding of an institution of higher learning within its borders. In 1762 the Philadelphia Baptist Association, in view of the disabilities attaching to Baptist students in most of the existing American colleges, welcomed a proposal offered by the Rev. Morgan Edwards, a clergyman of Welsh birth, at that time pastor of the First Baptist Church in Philadelphia, to found a college in Rhode Island that should be under the control of their own denomination. James Manning, a graduate of Princeton in the same year, was appointed by the Association as its agent to establish "a seminary of polite literature subject to the government of the Baptists."

In deciding upon the location of the new college, a canvass of the colonies had shown the advantages to be clearly on the side of Rhode Island, which recognized absolute religious liberty, and was, moreover, a Baptist colony in origin and popular attachment. There was no rival institution in the field; and the important cities of Newport and Providence, the former being the second city in New England, furnished an encouraging prospect of future support. Accordingly, in 1764, the friends of the movement obtained from the General Assembly the charter which still remains in force. Although, under the rules of the charter, a majority of both the Fellows and the Trustees must be Baptists, yet the three important positions of Chancellor, Secretary, and Treasurer are without denominational restriction, and all religious tests and sectarian instruction are strictly prohibited.

As the college was at the beginning without funds, and only a scanty return could be expected from students' fees, it was necessary that the president should support himself and his family by some other means. The founding of a Baptist church in Warren, and the call of Mr. Manning to its pastorate, offered a solution of the difficulty; and hither Mr. Manning brought his family in the spring of 1764. His first act towards the establishment of a college was the opening of a Latin school. This preparatory school was removed with the college to Providence, where it flourished for a hundred and forty years under the name of the University Grammar School. At the second meeting of the corporation, September 4,

1765, Mr. Manning was formally appointed "president of the college, professor of languages and other branches of learning;" the first student had been matriculated the day before. In the following year David Howell was appointed tutor, but no other addition was made to the faculty until 1774. In 1769 the first class of seven members was graduated at Warren. This town had not generally been regarded as the permanent seat of the college, and the necessity which now arose of erecting a college building compelled a final choice of location. After a spirited contest for the honor among the leading towns of the colony, the choice fell upon Providence. Here in 1770 the first college building, the present University Hall, modeled after Nassau Hall at Princeton, and a house for the president were both built on the college grounds.

In 1771 President Manning was called to the pastorate of the First Baptist Church in Providence; and he served the church in this capacity, in addition to his college duties, from that date until the close of his life. In December, 1776, the work of the college was interrupted by the Revolutionary war, and it was not resumed until the fall of 1782, University Hall meanwhile being used as a barrack and hospital for the combined American and French troops. Upon the reorganization of the college important additions were made to the library and the philosophical apparatus. In 1791, after twenty-nine years of service as founder and director of Rhode Island College, President Manning died. He had seen the college become firmly established, with a graduate roll of 149; the last graduating class, that of 1790, having numbered 22. At the time of his death the faculty consisted of the president, four professors, and two, tutors. The discipline during this period had been strict and paternal, the officers of instruction living under the same roof with the students and making frequent visits of inspection to their rooms. President Manning at first taught all the branches studied, but was designated professor of languages, afterwards of moral philosophy. David Howell, his assistant, taught mathematics and natural philosophy, and is said to have taught also French, German, and Hebrew. He was appointed professor of natural philosophy in 1769, and of law in 1790, but never taught the latter subject. A professor of natural history was appointed in 1784; and a professor of mathematics and astronomy in 1786.

The first college funds, amounting to \$4500, were collected in England and Ireland by the Rev. Morgan Edwards in 1767-68. In the next two years the Rev. Hezekiah Smith obtained subscriptions amounting to \$2500 in South Carolina and Georgia. The former contribution was made a permanent fund; the latter was expended in the construction of the college buildings. Further gifts were received for a time from the Philadelphia, Charleston, and Warren Baptist Associations, but they appear to have ceased with the outbreak of the Revolutionary war.

The successor of President Manning was the Rev. Jonathan Maxcy, a graduate in the class of 1787, who had been professor of divinity 1791-92.

He served from 1792 until 1802, when he resigned his office to accept the presidency of Union College. During the last year of his administration at Rhode Island College a class numbering 28 was graduated.

The third president of the college, the Rev. Asa Messer, a graduate in the class of 1790, who had served as professor of learned languages 1796-99, and of mathematics and natural philosophy 1799-1802, directed the affairs of the institution from 1802 until his resignation in 1826. During his presidency of twenty-four years the college was expanded in every direction. A class numbering 48 was graduated in 1825, the faculty in that year consisting of the president, nine professors, and two tutors. A medical school was established, which existed from 1811 until 1828, and sent out 87 graduates. The special professorships created for the medical school were *materia medica* and botany, 1811; anatomy and surgery, 1811; chemistry, 1811; theory and practice of medicine, 1815. A professor of moral philosophy and metaphysics was appointed in 1811; one of oratory and belles-lettres in 1815, and one of the Latin and Greek languages and literature in 1825.

In 1792 Nicholas Brown, a graduate in the class of 1786, gave \$500 with which to purchase law books for the Library. In 1804 he endowed a professorship of oratory and belles-lettres. In the same year the name of the institution was changed in his honor to Brown University. In 1810 the University Grammar School building, recently known as Lyon Hall, was erected, and in 1822 Mr. Brown built Hope College at his own expense. In 1826 the permanent funds of the University amounted to \$31,300.

The fourth president, the Rev. Francis Wayland, entered upon his official duties in 1827. He at once raised the standard of scholarship, and gradually increased the scope of the instruction. He finally accomplished an entire reorganization of the University on the basis of the elective principle. In accordance with this "New System" the bachelor's degree was given for a three year's course, and the master's degree for a course of four years. Graduate study and special study were both encouraged; and the sciences, in accordance with the spirit of the charter, were made prominent in the curriculum. This system was not put into operation until 1850, and was fully in force only until his retirement five years later. The increase in the scope of the curriculum during President Wayland's administration is clearly shown in the following list of subjects to which professors or instructors were assigned at the dates annexed: chemistry, physiology, and geology, 1834; moral and intellectual philosophy, 1834; belles lettres, 1835; rhetoric, 1837; Hebrew literature, 1838; modern languages and literature, 1843; Greek, 1843; Latin, 1844; French, 1844; history and political economy, 1850; natural philosophy and civil engineering, 1850; chemistry applied to the arts, 1850; rhetoric and English literature, 1851; didactics (i. e., pedagogy), 1851; analytical chemistry, 1854.

The influence of President Wayland was felt not so much in the increase of the number of students as in the higher intellectual and moral tone of the institution. Discipline, which had grown lax, was strictly enforced. During his administration the college grounds were laid out, and the library was placed on a sound financial basis. The permanent funds were increased to \$200,000, and three important buildings were erected: Manning Hall, given by Nicholas Brown in 1834; Rhode Island Hall, erected in 1840, from subscriptions by Rhode Island men and women; and the second President's House, the gift of Nicholas Brown, built in 1840. The last named building has been used since 1899 as a refectory. The total value of Mr. Brown's various gifts to the University was not less than \$160,000. Mr. Brown also served the University in a most efficient way as treasurer 1796-1825. He was trustee 1791-1825, and fellow from 1825 until his death in 1841. Dr. Wayland resigned the presidency in 1855, having won for the University, by his fame as a writer, thinker, and educational reformer, an enviable distinction both at home and abroad.

The fifth president of the University, the Rev. Barnas Sears, a graduate in the class of 1825, held office from 1855 until 1867, when he resigned the presidency to become general agent of the Peabody Education Fund. During his incumbency no new subject was added to the curriculum, except physical geography, in 1864. Although the term of President Sears covered the financial crisis of 1857 and the Civil War, a notable increase was made both in the funds and in the number of students. A system of scholarships was established, and over \$220,000 was collected in subscriptions. The Chemical Laboratory was built in 1862. In the last class that entered under President Sears seventy-three students were enrolled. Three hundred graduates and students of Brown entered the Union service, 1861-65. Of these twenty-one laid down their lives.

The Rev. Alexis Caswell, a graduate in the class of 1822, was the sixth president of the University, his term covering the years 1868-72. Under his administration the department of physics was organized, and the endowment was increased from \$365,000 to a sum exceeding \$550,000. The Jenks museum of zoölogy was founded in 1871. Upon the resignation of Dr. Caswell, the Rev. Ezekiel Gilman Robinson, a graduate in the class of 1838, was chosen his successor. His presidency extended over the seventeen years from 1872 to 1889. This period was marked not only by an increase in the attendance, the class of 1889 being graduated with a membership of fifty-six, but also by a high degree of intellectual and moral enthusiasm. The following subjects were added to the curriculum or were emphasized by the appointment of separate instructors: special branches of agriculture, 1872; zoölogy and agriculture, 1874; physiology, 1874; botany, 1877; zoölogy and geology, 1878; elocution, 1880; astronomy, 1884; logic, 1886; history, 1888; political economy, 1888. The funds were increased to \$980,000, and important additions were

made to the buildings. Rhode Island Hall was enlarged in 1875. The Library, the gift of John Carter Brown, of the class of 1816, was built in 1878. Slater Hall was given to the University by Horatio Nelson Slater in 1879. Sayles Hall, the gift of William Francis Sayles, a memorial to his son, William Clark Sayles, a member of the class of 1878, was built in 1881. University Hall, which had been renovated in 1850, was again renovated in 1883. Dr. Robinson recognized the fact that a great opportunity for a university existed at Brown, and continually strove to enlarge the scope of the institution. New courses were created, and a beginning was made in systematic graduate study. Dr. Robinson resigned the presidency in 1889.

The eighth president of the University was the Rev. Elisha Benjamin Andrews, a graduate in the class of 1870. With his accession in 1889 the modern life of the University properly begins. In the year preceding his presidency three graduate students were enrolled; in the last year of his term of service the graduate students numbered 101, the total number of students for the same years being, respectively, 268 and 860. The officers of instruction for the corresponding years increased in number from 22 to 73. All the old departments were expanded, and the number of departments was increased from 16 in 1889-90 to 25 in 1897-98. The department of philosophy was enlarged by the addition of psychology and pedagogy. American and European history were assigned to separate professors, political economy was made a department, and the department of social and political science and law was added. The department of fine arts was created, including the history of art, and music. The new department of Indo-European philology was introduced. The departments of Greek and Roman literature and history, English literature and language, and Germanic and Romance languages and literatures, were reorganized and extended. Rhetoric and oratory were made an independent department. The new department of Biblical literature and history, including the Semitic languages and New Testament Greek, was formed, and a course in the philosophy of religion was offered. The departments of mathematics, mechanical engineering, astronomy, physics (including electrical engineering), chemistry, zoölogy, geology and anthropology, and botany were extended in scope and thoroughness. New departments were formed for the subjects of mechanical drawing, civil engineering, comparative anatomy, military science and tactics, and bibliography. The museum of fine arts was founded in 1889, and that of anthropology in 1891.

The funds were increased to \$1,125,685, and important additions were made to the buildings and grounds. In 1891 Hope College was renovated, Wilson Hall, the bequest of George Francis Wilson, was built, the Ladd Observatory was presented to the University by the Hon. Herbert W. Ladd, and the Lyman gymnasium, named in honor of its principal donor, was erected. Maxcy Hall was built in 1895, and Pembroke Hall, the recitation building of the Women's College, in 1897. Three buildings,

known as the Howell, Messer, and Brown Street Houses, were also secured for dormitory purposes. The old playground of the University, now known as Lincoln Field, was graded and fitted up for ball games and other athletic purposes in 1889. In 1898 a new athletic field was laid out on Camp Street, a mile and a half from the University.

In 1891 the Grand Army of the Republic Fellowship Fund of \$10,000 was given to the University by the Rhode Island Department of that organization. In 1894 the University returned to the State of Rhode Island the scholarship fund of \$50,000 obtained from land-scrip received in 1863, due under act of Congress of July 2, 1862. At the same time the State paid the University \$40,000 in requital of its claim upon the Morrill fund, due to the State under act of Congress of August 30, 1890.

The Women's College was founded in October, 1891. At first only the privileges of University examinations and certificates of proficiency were granted. In June, 1892, all the College and University degrees and the graduate courses were opened to women. In November, 1897, the institution was accepted by the Corporation, and officially designated the Women's College in Brown University. The immediate charge of this department, subject to the direction of the president, was placed in the hands of the dean of the Women's College. It was required that all instruction be given by members of the University faculty. Pembroke Hall, which was built by the Rhode Island Society for the Collegiate Education of Women, was formally transferred to the University in October, 1897, and was accepted as the recitation hall of the Women's College.

Accompanying the material progress that marked the administration of President Andrews there was a steady and gratifying advance in moral and intellectual earnestness. In 1898 Dr. Andrews resigned the presidency to become Superintendent of Schools of Chicago. Dr. Benjamin Franklin Clarke, the senior member of the faculty, who had served as president *pro tempore* during the absence of Dr. Andrews in Europe in 1896-97, was appointed president *ad interim*, and served during the academic year 1898-99.

The ninth president of the University is the Rev. William Herbert Perry Faunce, a graduate in the class of 1880, who entered upon his official duties on Commencement Day, 1899. At Commencement, 1900, announcement was made of an addition of over a million dollars to the endowment of the University. To this was added a year later a second million, including the endowment of the John Carter Brown Library. In 1900 the Slater Memorial Homestead was presented by Mrs. Horatio N. Slater as a home for the students of the Women's College. In 1901 the Van Wickle gates were formally opened, and in the same year the President's House was erected at the corner of Hope and Manning streets. In 1902 the Van Wickle Administration Building was completed, this structure as well as the gates being the bequest of Augustus Stout Van

Wickle, of the class of 1876. In 1903 Rockefeller Hall, the gift of John D. Rockefeller, was opened for the use of the Brown Union, a social organization of students and alumni which was formed in that year. The building is provided with a maintenance fund raised by subscription. In the same year the Engineering Building on Lincoln Field, Caswell Hall, a dormitory fronting on Thayer street, and the Colgate Hoyt Swimming Pool, connected with the Gymnasium, the gift of Colgate Hoyt, were erected, and a magnificent organ, the gift of Lucian Sharpe, of the class of 1893, was placed in Sayles Hall. In 1904 the John Nicholas Brown gate was built as a memorial to the late John Nicholas Brown by his widow. In the same year the Carrie Tower, a clock tower, erected by Paul Bajnotti, of Turin, to the memory of his wife, Carrie Mathilde Brown, was presented to the University. Since 1901 an iron fence with brick and stone posts has been built in place of the old wooden fence around the front and the middle campus. Each section has been contributed by or in memory of some class. The classes of 1872, 1884, and 1887 have contributed gates, that given by the class of 1884 being in memory of President Robinson. In April, 1904, the funds of the University, exclusive of those pertaining to the John Carter Brown Library, amounted to \$2,492,198.

The Library of the University dates from 1767, when the Rev. Morgan Edwards collected books for it in England. The collection was at first kept in University Hall. It was removed to Manning Hall upon the completion of that building in 1835. In 1842 it contained ten thousand volumes, and in 1878, the date of its transference to the present building, its volumes numbered forty-eight thousand. The present number, including the books in the twelve department libraries, but not including the John Carter Brown Library, is about one hundred and thirty thousand volumes. Upon the removal of the College to Providence in 1770 the professors and students enjoyed the hospitality of the Providence Library Company, now the Athenæum, in extension of the scanty resources of the College Library. The Library of the Rhode Island Historical Society and the State Law Library have in later years been most valuable adjuncts to the University Library, and, since the opening of the Providence Public Library in 1878, members of the University have made constant use of its choice and readily available resources. The Library Fund, established under President Wayland, has been supplemented by ten special funds, devoted to the departments of European History, United States History, Mediæval and Church History, Botany, the Arts of Design, Biology, the Classical Languages and Literatures, English Literature, and American Poetry. Gifts of one thousand dollars each were made to the Library in recent years by the classes of 1872, 1884, 1885, 1886, 1887, and 1888, and were of material assistance towards enabling the Library to meet the ever-growing demands made upon it by the work of the University. In 1884, by the will of the Hon. Henry B. Anthony,

the Library came into possession of the Harris Collection of American Poetry, numbering 5000 volumes. In 1901 there was presented to the University the John Carter Brown Library, unquestionably the most complete collection in the world on the history of the two Americas down to the end of the eighteenth century. The books were accompanied by a gift of \$500,000 as an endowment, and \$150,000 for the erection of a building for their accommodation. The building was dedicated in May, 1904.

In October, 1903, the University received by the gift of Marsden J. Perry, of Providence, the Sidney S. Rider Collection of manuscripts, books, and other material, forming the most important existing library on the History of Rhode Island.

At the close of the 136th Commencement of the University in 1904, there were enrolled the names of 5896 graduates—5599 men and 297 women. Of this number 5151 had received the College or University first degree; 77, exclusive of the foregoing, had received advanced degrees; 69, not previously reckoned, had received the degree of Doctor of Medicine; while 599 others had received honorary degrees. Of the entire number, 3128, or 53 per cent., were living.

Admission to the University

METHODS OF ADMISSION TO THE FRESHMAN CLASS

1. ADMISSION BY EXAMINATION

Examinations for admission to the Freshman class are held in Wilson Hall on the Thursday, Friday, Saturday, and Monday next following Commencement in June, and also on the Thursday, Friday, Saturday, and Monday next preceding the beginning of the academic year in September. Candidates may be examined in all the subjects in June or in September, or in part in June and in the remainder in September, but they must conform strictly to the appointed schedule as to time and place for the several examinations.

The order of the examinations in 1905 will be as follows:

THURSDAY, JUNE 22 and SEPTEMBER 14

Algebra, Wilson Hall 27, 8 A. M. to 10 A. M.

Geometry, Wilson Hall 27, 10 A. M. to 12 M.

Elementary French, Wilson Hall 2, 1 P. M. to 3 P. M.

Advanced French, Wilson Hall 2, 4 P. M. to 6 P. M.

FRIDAY, JUNE 23 and SEPTEMBER 15

Elementary Greek, Wilson Hall 2, 8 A. M. to 10 A. M.

Astronomy, Wilson Hall 25, 8 A. M. to 10 A. M.

Advanced Greek, Wilson Hall 2, 10 A. M. to 11.30 A. M.

Physical Geography, Wilson Hall 25, 10 A. M. to 12 M.

Latin, Wilson Hall 25, 12.30 P. M. to 4 P. M.

English and American History, Wilson Hall 27, 4 P. M. to 6 P. M.

Freehand Drawing. Candidates will offer their plates for examination at Wilson Hall 2, at 2 P. M.

SATURDAY, JUNE 24 and SEPTEMBER 16

English, Wilson Hall 26, 8 A. M. to 10 A. M.

Chemistry, Wilson Hall 2, 11 A. M. to 1 P. M.

Solid Geometry, Wilson Hall 27, 2 P. M. to 4 P. M.

Plane Trigonometry, Wilson Hall 27, 4 P. M. to 6 P. M.

MONDAY, JUNE 26 and SEPTEMBER 18

Elementary German, Wilson Hall 2, 8 A. M. to 10 A. M.

Advanced German, Wilson Hall 2, 10 A. M. to 12 M.

Ancient History, Wilson Hall 25, 1 P. M. to 3 P. M.

Physics, Wilson Hall 1, 4 P. M. to 6 P. M.

If desired, examinations will be appointed in cities remote from Providence. Correspondence on this subject should be addressed to the Registrar of the University, and sent at least four weeks before the time of the examinations.

Examinations conducted under the supervision of the College Entrance Examining Board will be accepted in place of the corresponding examinations conducted by Brown University. But a supplementary examination is necessary in case the examination given by the College Entrance Examining Board does not fully cover the Brown University requirement.

2. ADMISSION BY CERTIFICATE

Students are also admitted upon presentation of a certificate signed by the principal of any school which has the privilege of issuing certificates to Brown University.

In New England only schools approved by the New England College Entrance Certificate Board have this privilege. Principals of schools in New England who desire the certificate privilege for Brown University, or for any of the colleges represented on the New England College Entrance Certificate Board, should address the Secretary of the Board, Professor Nathaniel F. Davis, 159 Brown St., Providence, R. I., who will furnish the necessary application blanks. These blanks must be returned to him before April 1st of the year for which the certificate privilege is desired.

Certificates from the New York Board of Regents are accepted for the specified subjects so far as they coincide with the entrance requirements of Brown University. The principals of schools situated outside of New England who desire the certificate privilege must make application to the Registrar and furnish satisfactory evidence that the course of study in the school meets the requirements for admission. Blank forms for this purpose will be supplied on request. Application for the privilege of certification should be made before May 1st, in order that action may be taken by the close of the academic year.

Certificates are accepted for admission to the Freshman class only, not for admission to advanced standing. If any candidate offers for admission subjects in excess of those required, he may be examined in them at the appointed times above scheduled and receive credit for them as college studies.

Blank forms for the certification of candidates may be obtained by the principals of schools on the accredited list from the Registrar. They should be sent to him by July 1st. When a student has attended more than one school, a letter of recommendation from the principal of the institution last attended should accompany the certificate.

REQUIREMENTS FOR ADMISSION TO THE FRESHMAN CLASS

FOR CANDIDATES FOR THE DEGREE OF BACHELOR OF ARTS

The subjects are arranged in three groups, the figures in parenthesis in Groups II and III indicating the value in points assigned to each subject. For the amount required, reference is made to the paragraphs on pages 42-49 giving the details of the requirements.

In Group I all subjects must be presented.

In Group II subjects aggregating 6 points, including at least 3 points in ancient language and at least 1 point in modern language, must be presented.

In Group III one subject may be presented. Students who present no subject in Group III must present subjects aggregating 7 points in Group II.

ENTRANCE REQUIREMENTS IN THE SEVERAL SUBJECTS

I. ENGLISH

The preparation in English should include: (a) careful and prolonged training in grammar and composition; (b) thoughtful reading of all the prescribed books, and careful study of those named in division 3 below. It is recommended that the student also do as much supplementary reading as possible and commit to memory a considerable amount of poetry. The examination is intended to test the candidate's power of clear and accurate expression and his knowledge and appreciation of the books read. While the major part of the examination is devoted to the prescribed reading, the importance attached to the ability to write clearly and correctly is equal to that attached to a knowledge of the prescribed reading. A candidate will not be accepted if his answers are seriously defective in spelling, use of capitals, punctuation, grammar, use of words, or structure of sentences and paragraphs, or if they show insufficient acquaintance with the subject-matter of the prescribed books. As additional evidence of preparation the candidate may present an exercise book, properly certified by his instructor, containing compositions or other written work. The examination consists of three parts, which, however, cannot be taken separately:

1. In the first part the candidate will be required to answer elementary questions in grammar and usage and to correct some examples of bad grammar and faulty choice of words.

2. In the second part the candidate must show a good general knowledge of the subject-matter of the books named; he should be able to state the leading thoughts of an essay, and to tell the main incidents, sketch the principal characters, and describe the striking scenes of a poem or novel. He should also be able to answer simple questions on the lives of the authors.

In 1905 the books for this portion of the examination will be: Shakspeare's *Merchant of Venice* and *Julius Cæsar*; *The Sir Roger de Coverley Papers* in *The Spectator*; Goldsmith's *Vicar of Wakefield*; Coleridge's *Ancient Mariner*; Scott's *Ivanhoe*; Carlyle's *Essay on Burns*; Tennyson's *Princess*; Lowell's *Vision of Sir Launfal*; George Eliot's *Silas Marner*.

In 1906, 1907, and 1908 they will be: Shakspeare's *Macbeth* and *The Merchant of Venice*; *The Sir Roger de Coverley Papers* in *The Spectator*; Irving's *Life of Goldsmith*; Coleridge's *Ancient Mariner*; Scott's *Ivanhoe*

and *The Lady of the Lake*; Tennyson's *Gareth and Lynette*, *Lancelot and Elaine*, and *The Passing of Arthur*; Lowell's *Vision of Sir Launfal*; George Eliot's *Silas Marner*.

3. The third part requires careful and detailed study of the works named below. The examination covers subject-matter, logical structure, and literary form. Questions are asked about the style, the verse, the structure of the plots, the development of the characters, the meaning of words and allusions, and (in the case of essays and speeches) the logical structure of the whole.

In 1905 the books for this portion of the examination will be: Shakspeare's *Macbeth*; Milton's *L'Allegro*, *Il Penseroso*, *Comus*, and *Lycidas*; Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*.

In 1906, 1907, and 1908 they will be: Shakspeare's *Julius Cæsar*; Milton's *L'Allegro*, *Il Penseroso*, *Comus*, and *Lycidas*; Burke's *Speech on Conciliation with America*; Macaulay's *Essay on Milton*, and *Life of Johnson*.

II.

ALGEBRA

Through equations of the second degree.

Although candidates are not examined in Arithmetic, a knowledge of its fundamental principles and a careful training in accurate computation with whole numbers and with vulgar and decimal fractions are regarded as essential parts of a preparatory course.

The requirement in Algebra includes the following subjects: factors, common divisors, and multiples; fractions, ratios, and proportions; negative quantities and the interpretation of negative results; the doctrine of exponents; radicals, and equations involving radicals; the binomial theorem for positive integral powers of the binomial, and the extraction of roots; putting questions into equations, and the reduction of equations; the ordinary methods of elimination, and the solution of both numerical and literal equations of the first and second degrees with one or more unknown quantities, and of problems leading to such equations; arithmetical and geometrical progression.

It is very important that the student should acquire a thorough knowledge not only of the practice, but also of the reasons involved in the elementary algebraic rules. He should likewise be able to use readily the more important formulæ, as, for example, the quadratic formula.

III.

PLANE GEOMETRY

The propositions which are contained in the ordinary treatises and which are recognized as constituting the elements of Geometry; original propositions and problems in mensuration.

Teachers of Geometry should lay stress on accuracy of statement and elegance of form as well as on clear and strict reasoning. They should avoid mere memory work, and should take special care in the proof of a proposition that no lines be drawn unless their construction is proved to be possible.

The school curriculum ought to be so arranged that not a single term, much less a year, shall pass without some time being given to a mathematical subject, and that both Algebra and Geometry shall be taken either in review or in advance during the last year of the course. For a four-year course an average of two and one-half hours a week should be given to mathematics.

IV.

SOLID GEOMETRY

The equivalent of the Solid and Spherical Geometry presented in Wells's *Geometry*, omitting the portion dealing with Regular Polyhedrons.

V.

PLANE TRIGONOMETRY

The equivalent of what is presented in the first seventy-six pages of Wells's *New Plane and Spherical Trigonometry*.

VI.

ELEMENTARY LATIN

1. Cæsar. *Galic War*, books I-IV, or books I-III and Sallust's *Catiline*, with questions on the forms, the constructions, and subject-matter.
2. Cicero. The *Orations against Catiline* and the *Oration for Archias*, with questions on the grammar and the subject-matter.
3. Ovid. Twenty-five hundred lines, with questions on the subject-matter and prosody.
4. Translation at sight of ordinary passages from Cæsar and Cicero, with questions on the ordinary forms and constructions
5. Translation into Latin of simple English sentences.

VII.

ADVANCED LATIN

1. Includes 1, 2, 3 mentioned under Elementary Latin.
2. Vergil. *Æneid*, books I-VI, or books I-V and the *Eclogues*, with questions on the constructions, subject-matter, and prosody.
3. Translation at sight of prose and verse, with questions on the constructions, subject-matter, and prosody.
4. Translation into Latin of a continuous passage of English narrative, prepared from some portion of the prescribed prose.

VIII.

ELEMENTARY GREEK

1. Xenophon's *Anabasis*, books I, II, III, IV, regard being had not only to language but to subject-matter as well.

2. Grammar. A familiar knowledge of inflection, word-formation, and ordinary syntax.

3. Composition. Preparation in writing *connected* Greek prose. Thorough work in any text-book will be accepted. Candidates must show ability to write in Greek, with accents, an ordinary passage of English based upon material similar to the *Anabasis*.

IX.

ADVANCED GREEK

Three books of Homer, or *Anabasis*, books V, VI, VII, or *Anabasis*, book V and *Hellenica*, books I and II. Students will also be expected to show proficiency in the grammar and composition mentioned in the elementary requirement.

X.

ELEMENTARY FRENCH

1. Proficiency in elementary French grammar, implying, especially, familiarity with the following topics: inflection of nouns and adjectives in gender and number; the pronominal adjectives; the use of pronouns, especially the forms and positions of personal pronouns; the partitive constructions; the inflection of the regular verbs and of the more usual irregular verbs, such as *dire*, *faire*, and the classes represented by *ouvrir*, *sentir*, *venir*, *paraître*, *conduire* and *craindre*.

The mention of these topics is not to be understood as restrictive, but is meant rather to emphasize the importance of a thorough grounding of the pupil in those elements on which future good work depends.

2. Ability to translate simple prose at sight.

It is believed that the required facility can be gained by reading, concurrently with the grammar work, from two hundred to four hundred duodecimo pages, of at least three dissimilar works. It is desired that the books read shall not be those assigned in the University courses.

3. Ability to pronounce French and to recognize French words and simple phrases when spoken.

It is recommended that from the beginning careful attention be given to the fluent and intelligent reading aloud of the French texts used in the class-room.

XI.

ADVANCED FRENCH

1. The translation at sight of standard French into idiomatic English.
2. The translation into French of a connected passage of English prose, to test the candidate's familiarity with grammar. Proficiency in grammar may also be tested by direct questions.
3. The writing of French from dictation.

Candidates will be expected to show a thorough knowledge of accidence, and familiarity with the essentials of French syntax, especially the uses of tenses, modes, prepositions, and conjunctions.

The work should comprise the reading of from four hundred to six hundred pages of ordinary French, including the amount read for the elementary requirement; constant practice in giving French paraphrases, abstracts or reproduction from memory of selected passages; the study of a grammar of moderate completeness; writing from dictation.

XII.

ELEMENTARY GERMAN

1. Proficiency in elementary German grammar, implying, especially, familiarity with the following topics: declension of such nouns as are readily classified and of adjectives and pronouns; conjugation of weak verbs and of the more usual strong verbs; the commoner prepositions; the simpler uses of the modal auxiliaries; the simpler rules of syntax and of word order.

The mention of these topics is not to be understood as restrictive, but is meant rather to emphasize the importance of a thorough grounding of the pupil in those elements on which future good work depends.

2. Ability to translate a passage of simple prose at sight, when a vocabulary of the less usual words is furnished.

It is believed that the required facility can be gained by reading, concurrently with the grammar work, two hundred duodecimo pages of easy German, chiefly narrative prose, with a few lyric poems. It is desired that the books read shall not be those assigned in the University courses.

3. Ability to pronounce German and to recognize German words and simple phrases when spoken.

It is recommended that from the beginning careful attention be given to the fluent and intelligent reading aloud of the German texts used in the class-room.

XIII.

ADVANCED GERMAN

In addition to the elementary requirements:

1. Ability to translate at sight ordinary German into idiomatic English, the passages for translation being suited to the proficiency of those who have read not less than five hundred pages of classical and contemporary prose and verse selected from such works as Lessing's *Minna von Barnhelm*; Schiller's *Wilhelm Tell*, *Maria Stuart*, *Jungfrau von Orleans*, and *Gedichte*; Goethe's *Hermann und Dorothea* and *Gedichte*; Heine's *Reisebilder* and *Gedichte*; Freytag's *Die Journalisten* and *Bilder aus der Vergangenheit*; Scheffel's *Der Trompeter von Säckingen*; Uhland's *Gedichte*; Hoffmann's *Historische Erzählungen*; Meyer's *Gustav Adolf's Page*; Riehl's *Novellen*.

It is recommended that at least one-half of the reading be selected from the works of Lessing, Schiller, and Goethe.

2. Ability to state the main facts in the life of each author studied and to discuss the characters in the dramas read.

3. Ability to read aloud every text intelligently in the original. Such proficiency can be acquired only by constant oral practice in the classroom.

4. A knowledge of the elements of word-formation and of the principal uses of prepositions, conjunctions, modal auxiliaries, the subjunctive mode, and the infinitive.

Preparation for the advanced examination by candidates already prepared for the elementary examination should occupy at least five recitation periods a week in the last year of the preparatory course, or a smaller number of periods more widely distributed.

XIV.

HISTORY

Either of the two following groups, each including two fields of historical study:

1. Greek and Roman history. (a) Greek history to the death of Alexander, with due reference to Greek life, literature, and art. (b) Roman history to the end of the reign of Marcus Aurelius, with due reference to literature and government.

2. English and American history. (a) English history, with due reference to social and political development. (b) American history, with the elements of civil government.

For preparation in either (1) or (2) a course of study equivalent to at least three lessons a week for one year will be necessary, or five lessons a week for one year for both one and two.

The candidates will be expected to show such general knowledge of each field as may be acquired from the study of an accurate modern textbook of not less than three hundred pages, supplemented by not less than three hundred pages of suitable parallel readings.

XV.

PHYSICS

The equivalent of Hall and Bergen's *Text-book of Physics*, together with an approved laboratory course of at least forty experiments.

XVI.

CHEMISTRY

Candidates will be expected to have a good knowledge of the non-metals and their principal combinations, the metals and their principal salts, the more important topics of chemical philosophy, chemical nomenclature and notation, and the ordinary methods of stoichiometry. Candidates should have personally performed about one hundred simple experiments (those in Appleton's *Young Chemist* are mentioned as illustrations, but equivalents will be accepted). Each candidate is expected to submit his manuscript notes, or reports of his work. A course accomplishing the preparation above outlined will require an amount of time equivalent to three hours a week for one school year.

XVII.

ASTRONOMY

Class instruction for the equivalent of three hours a week for a school year in the elementary principles of the science, including observations of the heavens with reference to the positions and movements of the heavenly bodies. The following are the chief topics to be studied:

The Celestial Sphere; designation of the directions of a heavenly body.

The Earth—its axial rotation; time, latitude, longitude; its orbital revolution; precession, aberration, the seasons, equation of time, the calendar.

The Moon—its axial rotation, orbital motion, librations, phases, surface features, physical condition; lunar and solar eclipses.

The Sun—its rotation, physical characteristics, light, and heat.

The Planets—apparent and real motions, individual characteristics.

The Law of Gravitation—its control of the solar system; the tides.

Comets and Meteors.

The Stars; designation, classification by constellations, motions, distance, brightness, variables.

Stellar Systems; clusters, nebulae; the stellar universe, cosmogony

XVIII.

PHYSICAL GEOGRAPHY

Class instruction in the elementary principles of the science for the equivalent of three hours a week for a school year. It should include the following subjects:

The Earth as a member of the solar system.

The Atmosphere; its nature, temperature, pressure, moisture and precipitation, circulation, storms, weather, climate.

The Oceans; form and general characteristics, life within the oceans, waves, currents, tides.

The Lands; distribution, structure, processes of denudation and reconstruction and the resulting topographic features such as plains, plateaus, mountains, valleys, hills, volcanoes.

Life on the earth; influence of nature on man, influence of man on nature.

XIX.

FREEHAND DRAWING

Candidates will be required to show ability to execute plain lettering with readiness and neatness; to make orthographic sketches of simple machine parts; to make intelligible perspective sketches of simple models assuming different points of observation and applying the principles of shade and shadow. Candidates should submit to the head of the department of drawing a complete set of drawings made under the supervision of a teacher of drawing and properly certified by him.

REGULATIONS GOVERNING ADMISSION TO
ADVANCED STANDING

A candidate for admission to advanced standing who comes from an approved institution of collegiate rank may receive credit, without examination, for work done at such institution, provided that he present a detailed statement of his previous work and his standing therein, signed by the proper official. The amount of credit to be given is determined by the Committee on Admission to Advanced Standing.

Every other candidate for admission to advanced standing must first satisfy the entrance requirements of the course which he desires to enter. He may then receive credit for any subject included in the curriculum of the course, provided, first, that he notify in writing the Committee

on Admission to Advanced Standing at the time he applies for admission to the University of his intention to present such subject, and second, that he pass an examination in the subject before a date set by said Committee.

Every candidate must present a letter of honorable dismissal from the institution last attended.

Formal application for admission should be made to the Registrar, and should be sent, if possible, before August 1st.

REGULATIONS GOVERNING ADMISSION OF SPECIAL STUDENTS

The various courses of study in the University, both graduate and undergraduate, are open to mature persons of good character who have had the training requisite to pursue them with profit. This privilege is intended for those who wish to take advantage of the instruction offered in special branches without pursuing the full course of study required of candidates for a degree.

All students who can do so are advised to matriculate for a degree, and no one will be allowed to use the privilege here offered for the purpose of securing a merely nominal connection with the University.

Special students are subject to the same regulations regarding attendance and examinations as candidates for degrees, and must take fifteen hours of class-room work a week unless satisfactory reasons for a smaller assignment can be presented.

Applicants for special courses must present to the Registrar of the University, on or before August 1st if possible, a certified and detailed statement of the character and extent of their preparatory work, including testimonials of character and ability from the last school or college attended. In case a student has attended several preparatory schools, he must present credentials from all.

Students who withdraw from a preparatory school before completing its course of study will not be admitted as special students unless the principal of the school distinctly recommends such action.

Applicants must satisfy the officers of instruction, by examination or otherwise, that they are qualified to pursue the courses desired.

Special students will be admitted as candidates for a degree only after they have fully satisfied the requirements for admission either by certificate or by examination.

On leaving the University, a special student who desires a formal certificate of his attainments may receive it.

REGULATIONS GOVERNING ADMISSION OF GRADUATE STUDENTS

REGISTRATION

To be registered as a graduate student, the applicant either must have received the degree of Bachelor of Arts, of Philosophy, of Science,* or of Letters from an institution of good standing; or, being a candidate for the degree of Bachelor of Arts, of Philosophy, or of Science in Brown University, and having attained a rank of credit in the first three years of the undergraduate course, must have completed by the end of the third year the amount of work required for the baccalaureate degree for which he is a candidate, except the equivalent of extra work authorized by the Committee on Advanced Standing. But any student who, at the end of the third year of the undergraduate course, has to his credit less than the amount of work above indicated, may, after graduation, offer in fulfillment of the requirements for the degree of Master of Arts such extra work as he may have done in the undergraduate course, provided such extra work is in courses which may be taken by graduates and does not lie in more than three departments, and provided the student has completed the extra work with credit.

On or before the first day of the academic year, each candidate for registration must file an application with the Dean of the Graduate Department, naming the departments, not exceeding three, which he wishes to enter. The application must be made on a blank provided by the Dean, and the blank must be signed by the heads of the departments concerned. The candidate, if not a student or graduate of Brown University, must submit to the Dean, with his application, his diploma or other official evidence of having received a first academic degree, together with a marked catalogue or detailed statement showing the academic courses he has pursued. Applications from students unable to register at the beginning of the year will be considered at any time.

ENROLLMENT

A student who has been duly registered as a graduate student is enrolled as a candidate for a degree when his course of study for the degree has been approved by the Committee on Graduate Students and by the Faculty. To drop a course it is necessary to petition the Dean of the Graduate Department in writing, and to accompany the petition with

*NOTE: The degree of Bachelor of Science, when given for technical work does not lead to the degree of Master of Arts or Doctor of Philosophy in Brown University. The degree of Bachelor of Science referred to in these regulations means a degree given for a course of liberal study.

the approval of the head of the department which offers the course.

Although graduates of other colleges of good standing are entitled to registration as graduate students, they are not enrolled as candidates for degrees unless the course of study pursued by them in the institution from which they come is, in the opinion of the Dean of the Graduate Department acting in consultation with the Committee on Advanced Standing, substantially equivalent to the course leading to the corresponding degree in Brown University. While, as a rule, the privilege of enrollment, subject to the general regulations of the Faculty, is granted to graduates of colleges and universities of high standing, each case is considered on its merits. Graduates of colleges whose course of study is not, in the opinion of this joint Committee, equivalent to the corresponding course at Brown University may be registered as graduate students, but if enrolled they will be required to make up their deficiency under the direction of the Committee.

SPECIAL GRADUATE STUDENTS

Persons who have obtained the degree of Bachelor of Arts, of Philosophy, of Science, or of Letters, and who desire to pursue graduate studies without being candidates for an advanced degree, are allowed to register as special graduate students. Such students are subject to all the regulations of the University regarding graduate students except those which relate to candidacy for degrees.

Requirements for Degrees

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF ARTS

1. PRESCRIBED SUBJECTS

Ancient Languages (either Latin or Greek or both). Six hours.

At least three hours must be taken in the Freshman year, and the whole six hours must be completed by the end of the Sophomore year.

Modern Languages (either French or German or both). Six hours.

At least three hours must be taken in the Freshman year, and the whole six hours must be completed by the end of the Sophomore year.

Students presenting German only must take elementary French. Students presenting French only must take elementary German. Students presenting elementary French only must continue French in the Freshman year and take elementary German in either the Freshman or the Sophomore year. Students presenting elementary German only must continue German in the Freshman year and take elementary French in either the Freshman or the Sophomore year. Students presenting elementary French and elementary German only must continue both languages, but may postpone the continuation of one language to the Sophomore year. Students presenting elementary work in one language and elementary and advanced work in the other must take in the Freshman year the language in which the elementary work only was presented. Students presenting elementary and advanced work in both languages may take the required six hours in either French or German or both.

Mathematics. Freshman year. Four or five hours.

Those who present Solid and Spherical Geometry and Plane Trigonometry must take Mathematics five hours a week during the Freshman year. This includes the courses now numbered Mathematics 4, 5, 6, 7, 9, 10, and 12. Students taking these courses will be enabled to begin work in the sciences requiring Mathematics one year earlier than other students.

English (Rhetoric and Composition). Freshman year. Three hours.

European History. Three hours.

First and second terms, Sophomore or Junior year.

English Literature. Some three-hour course continuous through the year.

Sophomore, Junior, or Senior year.

Physical or Natural Science. Some three-hour course continuous through the year.

Freshman, Sophomore, or Junior year.

Political Science, Social Science, and Political Economy. The one-term elementary course in each of the three departments.

Sophomore, Junior, or Senior year.

Philosophy. Some three-hour course continuous through the year.

Sophomore, Junior, or Senior year.

NOTE: Candidates for the degree of Bachelor of Arts in June, 1905, are also required to take English 4, 5, 6, unless they have already received credit for the course.

2. REQUIREMENTS ARRANGED BY YEARS

FRESHMAN YEAR

I. *Required Studies*.

Latin 1, 2, 3, or Greek A, B, C or 1, 2, 3. Three hours.

French A, B, C or 1, 2, 3, or German 1, 2, 3, or 24, 25, 26. Three hours.

Mathematics 3, 1, 2. Four hours, or

Mathematics 4, 5, 6, 7, 9, 10, 12. Five hours.

English 1, 2, 3. Three hours.

II. *Elective Studies*. One three-hour course running through the year must be chosen from the following list:

Latin 1, 2, 3. For students presenting elementary and advanced Latin for admission.

Greek A, B, C. For students presenting no Greek for admission.

Greek 1, 2, 3. For students presenting elementary and advanced Greek for admission.

French A, B, C. For students presenting no French for admission.

French 1, 2, 3. For students presenting elementary French for admission.

French 10, 11, 12. For students presenting advanced French for admission.

German 1, 2, 3. For students presenting no German for admission.

German 24, 25, 26. For students presenting elementary German for admission.

German 34, 35, 36. For students presenting advanced German for admission.

Greek 46, Latin 46, 47, (History of Greek and Roman Life and Institutions). For all students.

Chemistry 1, 2, 3. For all students.

Chemistry 4, 5, 6. For students presenting Chemistry for admission (subject to the consent of the department).

Botany 1, 2, 3. For all students.

Comparative Anatomy 15, 1, 35. For all students.

SOPHOMORE YEAR

- I. That portion of the required work in ancient and modern languages not completed in the Freshman year.
- II. *Other required and elective courses sufficient with those taken under I. to make fifteen hours a week.

JUNIOR YEAR

- I. The required History and Physical or Natural Science, if not previously taken.
- II. *Other required and elective courses sufficient with those taken under I. to make fifteen hours a week.

SENIOR YEAR

REGULATIONS UNDER WHICH A STUDENT MAY BE PERMITTED TO TAKE A FIRST DEGREE IN LESS THAN FOUR YEARS

A candidate for a first degree, who has passed in the required number of hours of work and all the required subjects, may, at the end of the term in which his work is completed, be excused from further attendance at the University and may receive his degree at the Commencement next following such term.

A candidate for a first degree who has maintained a satisfactory standing in his studies may, subject to the consent of the Committee on Ad-

*Or some other course, not technical, chosen with the approval of the head of the Department of Electrical Engineering.

mission to Advanced Standing, take work in addition to the regular number of hours provided for in the curriculum of the course which he is pursuing.

A candidate for a first degree may receive credit for work done at the summer school of an approved institution of collegiate rank, provided that the work have the approval of the head of the related department in Brown University. Equivalent credit for the work given at the institution in question will be allowed at Brown University, but the total credit for work at summer schools for any one summer shall in no case exceed fifteen term hours.

A candidate for a first degree may, with the consent of the head of any department and with the approval of the faculty, pursue studies connected with said department during any summer in which he does not attend a summer school, and may receive credit for such studies, provided, first, that the work be under the supervision of the head of the department concerned; second, that he pass an examination in all the work before the end of the following term. The amount of credit for work of this kind shall be determined by the head of the department, but the total credit for any one summer shall not exceed nine term hours. No student will be allowed to do summer work in connection with any department of the University until he has presented to the head of the department a registration slip properly filled, and signed by the Registrar.

If a student at the beginning of his senior year lacks less than forty-five term hours of completing his course he may, for reasons deemed sufficient by the Committee on Admission to Advanced Standing, distribute his work over the year.

If a student at the beginning of any term lacks less than fifteen term hours of completing his course he may, for reasons deemed sufficient by the Committee on Admission to Advanced Standing, be excused from taking more than the necessary number of hours.

For conditions under which graduate work may be pursued during the Senior year, see page 51.

REQUIREMENTS FOR THE DEGREE OF MASTER OF ARTS

To obtain the degree of Master of Arts, the candidate must have obtained the degree of Bachelor of Arts, of Philosophy, of Science,* or of Letters; or, being a candidate for the degree of Bachelor of Arts or Bachelor of Philosophy in Brown University, must have been duly enrolled as a candidate for the degree of Master of Arts in the way previously specified, and must have completed a course of liberal graduate study, in addition to that required for the bachelor's degree, of not less than fifteen hours a week for one year, and must have passed satisfactory examinations thereupon. When graduate students pursue courses primarily designed

*See foot note, page 51.

for undergraduates, a higher degree of scholarship will be required than in the case of undergraduates.

Work definitely specified as done in residence for an advanced degree at another institution, and not to be used in fulfillment of the requirements for any advanced degree elsewhere, may, with the approval of the Dean of the Graduate Department, be offered in partial fulfillment of the requirements for the degree of Master of Arts; but the equivalent of at least nine hours' work a week for one year must be done at Brown University.

By continuous residence at the University, candidates fulfilling the conditions specified above may obtain the degree in one year. In cases of partial or entire non-residence, the degree of Master of Arts will not be conferred until after two years of study; the work required is the equivalent of fifteen hours a week for one year. Candidates for this degree, registered in absentia, who desire some instruction at the University, may register for the courses desired. A final public examination is required of all candidates in absentia.

The degree of Master of Arts in absentia must be taken within three years after enrollment, unless the period is extended by special action of the Faculty. Candidacy may be terminated for cause at any time within six months after registration.

Candidates in absentia must register (by correspondence if necessary) at the beginning of each college year, and make reports to their instructors at the end of each term.

The examination of a candidate for the degree of Master of Arts in absentia will be held only when notification of the intention to appear for examination is given on or before April 1st of the year in which the candidate desires to receive the degree.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

To obtain the degree of Doctor of Philosophy, the candidate must first have obtained the degree of Bachelor of Arts, of Philosophy, of *Science, or of Letters. He must spend at least two years continuously in residence, pursuing a systematic course of advanced study approved by the Graduate Department, the Faculty, and the Board of Fellows, and pass satisfactory examinations on the same. Work definitely specified as done in residence toward the degree of Doctor of Philosophy at another institution, and not to be used in fulfillment of the requirements for any advanced degree elsewhere, may, with the approval of the Dean of the Graduate Department, be offered in partial fulfillment of the requirement for the degree of Doctor of Philosophy. One full year of continuous work,¹ however, must be spent at Brown University. The candidate must conclude his course with a

*See foot-note, page 51.

thesis embodying the results of original research, giving evidence of high scholarship and of special attainments in the studies pursued, and constituting as a whole a definite contribution to knowledge. The candidate is examined publicly before the first day of June by a committee consisting in each case of the Graduate Department, together with those members of the Faculty who have directed the work of the candidate and any other officers of professorial rank in the respective departments. The examination is held only when notification of the intention to appear for examination is given on or before April 1st of the year in which the candidate desires to obtain his degree. The thesis of a candidate for the degree of Doctor of Philosophy must be presented to the Faculty, in type-written copy or print, before May 1st, in that year. The approval of this thesis by the Faculty is essential to the attainment of the degree.

For the degree of Doctor of Philosophy work in at least two subjects is necessary, a major and a minor, not in the same department. The work of the major subject must amount to not less than three-fifths of the whole. The selection of the courses constituting the major and minor subjects must receive the approval of the head of the department in which the major subject lies, and of the Dean of the Graduate Department. The approval of the head of the department in which the minor subject lies is also necessary for the courses elected in his department.

The candidate must further possess a reading knowledge of Latin, German, and French suitable for the purposes of his special studies, unless for sufficient reasons excused in respect to one of these languages. To test the candidate's proficiency in this particular, he is examined before December 1st, in the last year of his candidacy, by a committee consisting of the heads of the departments in which the major and minor subjects lie, and the heads of the departments of Latin, German, and French.

A year of work for the degree of Master of Arts may be, but is not necessarily, counted as a year of work for the degree of Doctor of Philosophy.

Courses of Instruction

In every department courses listed together (e. g. Art 14, 15, 16) are regarded as forming a unit, and unless specific statement to the contrary is made, the second term may not be elected without the first, nor the third without the second.

I. ART

Professor POLAND

Courses 1, 4, and 6 may be taken independently, but students are advised to elect all three in the above order, in which order they form a consecutive historical outline. Course 1 should be taken, if possible, before any other course in the history of art. Courses 7, 9 follow consecutively after 6. Courses 10, 11, and 3 are especially designed for those who wish to do advanced work in classical archæology, philology, or history.

1. *Ancient Art or Classical Archæology.*

Three hours. First Term. Elective for Juniors, Seniors, and Graduates.

A general course in the history of ancient art, chiefly Greek. Text-book; lectures illustrated by casts, slides, photographs, and engravings; collateral reading.

4. *Roman, Early Christian, and Mediæval Art.*

Three hours. Second Term. Elective for Juniors, Seniors, and Graduates.

Study of Roman, Romanesque, and Gothic art, with some notice of Byzantine, Arabian, and Oriental art. Text-book, lectures, lantern views.

6. *Art of the Renaissance.*

Three hours. Third Term. Elective for Juniors, Seniors, and Graduates.

The fifteenth and sixteenth centuries. The effect on art of the dominant motives of the epoch, the development of art in the different countries of Europe, the great masters and their most significant works. Text-book, lectures, lantern views.

14, 15, 16. *Practical Work in Art.*

Three hours. Through the year. Elective for students who are taking, or who have passed in Art 1, 4, 6, and who have also passed in Drawing 2, 3, 4, or have equivalent proficiency in drawing. Given at the Rhode Island School of Design.

Six hours of drawing or other practical work. To illustrate the principles of delineation, color, and chiaroscuro, and the principles of design in architecture, sculpture, and painting, as exemplified in the historic forms of art.

[I. Art, continued.]

7, 9. *Modern Art.*

Three hours. First and Second Terms. Elective for Juniors, Seniors, and Graduates, who have passed in 6.

First Term, the seventeenth and eighteenth centuries; Second Term, the nineteenth century. Text-books, lectures, special assigned topics, lantern views.

8. *Theory and Criticism of the Fine Arts.*

Three hours. Third Term. Elective for students who have passed in any course in Art.

A study of the more important facts and laws of artistic production. Text-book, special assigned topics, illustrated lectures.

[10. *Seminary in Classical Architecture.*]

Elective for Graduates. Not offered in 1904-05.

Critical study; Vitruvius read in the original Latin; discussion of the principles followed by the Greek and Roman architects, and of the influence of Vitruvius upon the Renaissance.

[11. *Seminary in Greek and Roman Sculpture.*]

Elective for Graduates. Not offered in 1904-05.

An archæological course based on Overbeck's *Schriftquellen*.

3. *Seminary Study of the Acropolis of Athens.*

Three hours. First Term. Elective for Graduates who read Greek and Latin.

Critical reading, in the Greek, of Pausanias's account of the Acropolis of Athens; lectures and illustrations.

[12. *Seminary in Renaissance Art.*]

Elective for Graduates. Not offered in 1904-05.

II. ASTRONOMY

Professors UPTON and SLOCUM

Courses 3, 4, 5, and 17, 18, 19, cover in part the same ground and may not both be taken by the same student, but either may be taken at the same time as the general course 1, 2, 6. On application special instruction for Graduates will be provided at the Ladd Observatory.

[II. Astronomy, continued.]

1, 2, 6. *General Course.*

Three hours. Through the year. Elective for Juniors and Seniors who have passed in Mathematics 1, 2, 3.

Fundamental conceptions of the science, methods of professional study, and present state of our knowledge of the heavenly bodies. Young's *Manual of Astronomy*, lectures and abstracts upon assigned topics. Designed either for purposes of general culture or as a preparation for technical work.

Professor UPTON [this year Professor SLOCUM]

3, 4, 5. *Geodetic Astronomy.*

Three hours. Through the year. Required of Engineering students. Elective for Juniors and Seniors who have passed in Mathematics 1, 2, 3.

Application of astronomy to geodesy; use of the sextant, transit, and zenith telescope for determining time, latitude, longitude, and azimuth.

Professor SLOCUM

17, 18, 19. *Nautical Astronomy.*

Three hours. Through the year. Elective for Sophomores, Juniors, and Seniors, who have passed in Mathematics 1, 2, 3.

Principles of navigation, methods of determining the position of a ship at sea; use of sextant, compass, and chart for determining latitude, longitude, bearings, and courses.

Professor SLOCUM

[8, 9, 10. *Practical Astronomy.*]

Three hours. Through the year. Elective for Graduates, and for Undergraduates who have shown special aptitude in either 1, 2, 6, or 3, 4, 5. Not offered in 1904-05.

Advanced study of geodetic applications of astronomy; method of least squares. Doolittle's *Practical Astronomy*, with instrumental observations.

Professor UPTON

[14, 15, 16. *Mathematical Astronomy.*]

Three hours. Through the year. Elective for Graduates. Not offered in 1904-05.

Mathematical theory of planetary and cometary orbits; micrometer observations and calculation of orbits.

Professor UPTON

III. BIBLICAL LITERATURE AND HISTORY

Professor FOWLER and Mr. BRAUN

For conditions under which students may receive credit in the Newton Theological Institution for work done in this department, see a later page under Arrangements with other Institutions.

[III. Biblical Literature and History, continued.]

HEBREW

1, 2, 3. *Elementary Hebrew.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates.

Mr. BRAUN

16, 17, 18. *Historical Hebrew.*

Three hours. Through the year. Elective for students who have completed Hebrew 1, 2, 3.

Reading of the books of Samuel and Kings with special attention to the acquisition of a vocabulary. Review of the grammar.

Mr. BRAUN

13, 14, 15. *Hebrew Seminary.*

Three hours. Through the year. Elective for Graduates and approved Undergraduates.

Subject for 1903-04: Legal Literature. Critical translation of the legal books of the Old Testament and study of the development of Israel's law codes. In succeeding years corresponding courses in the Prophetic, Psalm, and Wisdom literature of the Old Testament will be offered.

Professor FOWLER

19, 20. *Textual Criticism of the Old Testament.*

Three hours. Second and Third Terms. Elective for Graduates.

Professor FOWLER

ARAMAIC AND TALMUDIC

1, 2, 3. *Aramaic and Talmudic.*

Two hours. Through the year. Elective for Seniors and Graduates who have completed Hebrew 1, 2, 3.

First Term, grammar and reading of the Targum. Second Term, reading of all the Aramaic portions of the Old Testament. Third Term, selected Mishnaic treatises, Pirke Aboth. Study of the ethical teachings of the Rabbis.

Mr. BRAUN

ARABIC

1, 2, 3. *Elementary Arabic.*

Two hours. Through the year. Elective for Seniors and Graduates.

Professor FOWLER

[III. Biblical Literature and History, continued.]

NEW TESTAMENT LANGUAGE AND LITERATURE

5, 1, 2. *Gospels and Epistles.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates. Each term may be elected separately.

Characteristics of Hellenistic Greek. Translation and investigation of date, authorship, and teachings. First Term, the Gospel and First Epistle of John. Second Term, the Gospel of Mark and the First Epistle of Peter. Third Term, the Gospels of Matthew and Luke.

Professor FOWLER

[7, 6, 3. *Acts and Pauline Epistles.*]

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates. Not offered in 1904-05.

First Term, Acts. Second Term, Thessalonians and Galatians. Third Term, Corinthians and Romans.

Professor FOWLER

BIBLICAL LITERATURE AND HISTORY IN ENGLISH

Courses 1-6 below are designed not only as a foundation for special Biblical work, but also as a means of liberal culture. They form a two-years' consecutive course, giving a comprehensive view of the entire field of Biblical history and literature.

4, 5, 6. *Hebrew History and Literature.*

Three hours. Through the year. Elective for Sophomores, Juniors, and Seniors. Each term may be elected separately.

Professor FOWLER

[1, 2, 3. *Jewish and Early Christian History and Literature.*]

Three hours. Through the year. Elective for Sophomores, Juniors, and Seniors. Each term may be elected separately. Not offered in 1904-05.

Professor FOWLER

7, 8, 9. *Biblical Seminary in English.*

Three hours. Through the year. Elective for Graduates and approved Juniors and Seniors.

Subject for 1904-05: The Wisdom literature of Israel.

Professor FOWLER

IV. BOTANY

Professor BAILEY and Mr. COLLINS

1, 2, 3. *General Morphology, Physiology and Ecology.*

Three hours. Six hours of attendance. Through the year. Elective for Undergraduates.

Comparative study of the seed, the seedling, and the mature plant; variations due to environment; experiments in plant physiology; classification, etc. Intended especially to train the student to observe and properly interpret the more obvious phenomena of plant life, as well as to furnish the necessary preparation for advanced work.

Professor BAILEY and Mr. COLLINS

[4, 5. *Histology and Physiology.*]

Three hours. Six hours of attendance. First and Second Terms. Elective for students who have passed in 1, 2, 3. Not offered in 1904-05.

Structure and physiology of vegetable cells, tissues, and organs; embryology; micro-technic.

Mr. COLLINS

[14. *Medical Botany.*]

Three hours. Five hours of attendance. Third Term. Elective for students who have passed in 5. Not offered in 1904-05.

The more important medical plants and their constituents; location, characteristics, and methods of extraction of the more important drugs.

Mr. COLLINS

NOTE: 4, 5, 14, to be offered in 1905-06, alternate with 7, 12, 9.

7. *Lower Cryptogams.*

Three hours. Six hours of attendance. First Term. Elective for students who have passed in 3.

Structure and development of types of the lower fungi and algæ; collection, classification, etc.

Mr. COLLINS

12. *Higher Cryptogams.*

Three hours. Six hours of attendance. Second Term. Elective for students who have passed in 7.

Structure, development, and classification of the hepaticas, mosses, ferns, horse-tails, and club-mosses.

Mr. COLLINS

9. *Mycology.*

Three hours. Six hours of attendance. Third Term. Elective for students who have passed the required examinations.

Structure, development, collection, preservation, and classification of edible, poisonous, and other fungi; plant diseases.

Mr. COLLINS

V. CHEMISTRY

Professors APPLETON and BUCHER, Messrs. BABASINIAN, DUMMER and R. D. CADY

1, 2, 3. *Descriptive Chemistry.*

Three hours. Through the year. Elective for Undergraduates.

Non-metals; metals, their metallurgy, compounds, and practical applications; theoretical chemistry. Lectures with experiments; written exercises; individual laboratory work.

Professor BUCHER, Messrs. BABASINIAN and DUMMER

4. *Qualitative Analysis.*

Three hours. Six hours of attendance. First Term. Elective for Juniors.

Properties of the metallic elements, with their separation from certain of their compounds. Laboratory work; recitations in qualitative analysis and in chemical philosophy; exercises in stoichiometry.

Professor APPLETON and Mr. CADY

5. *Qualitative Analysis, continued.*

Three hours. Six hours of attendance. Second Term. Elective for Juniors.

The principal non-metals and the acids formed by them; methods of separation and recognition of acids and acid radicles.

Professor APPLETON and Mr. CADY

6. *Quantitative Analysis.*

Three hours. Six hours of attendance. Third Term. Elective for Juniors.

Quantitative precipitations and separations of the most important elements and compounds; the principles upon which quantitative apparatus is constructed; chemical philosophy and stoichiometry continued. Chiefly laboratory work.

Professor APPLETON and Mr. CADY

7, 8, 9. *Quantitative Analysis, advanced.*

Six hours. Twelve hours of attendance. Through the year. Elective for Seniors and Graduates who have passed in 1-6.

Assaying of metallic ores, analysis of agricultural materials, testing of chemicals used in textile establishments, etc.

Professor APPLETON and Mr. CADY

10, 11, 12. *Organic Chemistry.*

Six hours. Through the year. First and Second Term, three lectures a week and three laboratory periods a week. Elective for Juniors, Seniors, and Graduates.

Preparation and analysis of representative organic compounds; lectures, recitations, and laboratory work.

Professor BUCHER and Mr. BABASINIAN

[V. Chemistry, continued.]

13. *Assaying.*

Six hours. Twelve hours of attendance. Third Term. Elective for Seniors and Graduates who have passed in 1-6.

Professor APPLETON and Mr. CADY

23. *Dyeing of Cotton, Wool, and Silk.*

Six hours. Twelve hours of attendance. Third Term. Elective for Seniors and Graduates.

The preparation and use of mordants, dye-stuffs, etc.

Professor APPLETON and Mr. CADY

31, 32, 33. *Industrial Chemistry.*

Through the year. Elective for Graduates. Each term may be elected separately.

Lectures and laboratory work.

Professor APPLETON

[41, 42, 43. *Physical Chemistry.*]

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates. Not offered in 1904-05.

Lectures and laboratory work.

Professor BUCHER

51, 52. *Organic Chemistry, advanced course.*

Three hours. First and Second Terms. Elective for Graduates. Not to be offered in 1905-06.

Professor BUCHER

63. *Inorganic Chemistry, advanced course.*

Three hours. Third Term. Elective for Juniors, Seniors, and Graduates. Not to be offered in 1905-06.

Professor BUCHER

71, 72, 73. *Organic Preparations, advanced course.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates.

Professor BUCHER

81, 82, 83. *Inorganic Preparations, advanced course.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates.

Professor BUCHER

91, 92, 93. *Research Work in Chemistry.*

Three hours. Through the year. Elective for Graduates.

Professor BUCHER

101, 102, 103. *Conference on Special Topics in Chemistry.*

One hour. Through the year. Elective for approved students.

Professor BUCHER

111, 112, 113. *Conference on Special Topics in Chemistry.*

One hour. Through the year. Elective for approved students.

Professor APPLETON

VI. CIVIL ENGINEERING

Professors HILL and BLANCHARD

All courses in this department are required of candidates for the degree of Bachelor of Science in Civil Engineering; all except 25, 26, 27 are elective for other students.

A thesis on a professional subject is required before graduation of all candidates for the degree of Bachelor of Science in Civil Engineering. The thesis must embody either a design or a review of an engineering plant, appliance, process, or structure, or the results of an experimental investigation.

1, 2, 3. *Surveying, elementary course.*

Three hours. Usually six hours of field work or drafting. Through the year. Elective for students who have passed in Mathematics 1, 2 and 3, and in Drawing 1 or 16.

Designed to give the theory and practice of plane surveying. Use of tape, compass, level, and transit. Adjustments of instruments. Lectures, recitations, field work, and drafting.

Professors HILL and BLANCHARD

4. *Topographical Drawing.*

Three hours. Six hours of drafting. Second Term. Elective for Juniors and Seniors who have passed in Drawing 1 or 16.

Pen and colored topography. Hill shading by different methods, contour drawing, topographic map making, conventional signs for structural materials.

Professor BLANCHARD

8, 8a. *Surveying, advanced course.*

One hour and three hours. Third Term. Elective for students who have passed in 1 and 2.

Topography and hydrography, city surveying. Methods as in 1, 2, 3. Use of stadia, plane table, sextant, and barometer. Precise base-line measurements with steel tape. The field work (8a) is done during the spring recess.

Professors HILL and BLANCHARD

5, 5a, 6, 7. *Railroad Engineering.*

Two, four (eight hours of field work), three and three hours. First, Second and Third Terms. Elective for students who have passed in 3 and 8.

Theory, location, construction, and economics. Methods as in 1, 2, 3. First Term, railroad curves and practical problems; actual location of a line about two miles long, map, and estimate of cost. Second Term, railroad track and track work, ties, ballast, rails, frogs, switches, etc.; maintenance of way department; methods of work. Third Term, earthwork and its cost; economics of location.

Professors HILL and BLANCHARD

[VI. Civil Engineering, continued.]

10. *Hydraulic Engineering.*

Three hours. Second Term. Elective for Juniors and Seniors.

Consideration of water supply mainly from a sanitary standpoint. A general course designed to give the chemical and biological aspects of water supply without laboratory work. Lectures, recitations, and seminary work.

Professor HILL

11. *Hydraulic Engineering.*

Three hours. Third Term. Elective for students who have passed in Mathematics 13 and Mechanics 4.

Supplements the courses in Mechanics 7 and 8, which give the theoretical treatment of the subject. Consideration of water supply mainly from an engineering standpoint. Irrigation, pumps, and pumping machinery. Construction of dams and reservoirs. Lectures, recitations, and seminary work.

Professor HILL

17. *Sanitary Engineering.*

Three hours. Third Term. Elective for students who have passed in Mathematics 13, Mechanics 4, and Drawing 6.

Sewerage and house drainage. Chiefly theory of sewerage, with occasional problems in design. Treatment and disposal of sewage, stream pollution, appliances used in construction and maintenance amount and velocity of flow; house drainage and its appliances; garbage collection and disposal. Lectures, recitations, and seminary work.

Professor HILL

NOTE: Courses 10, 11 and 17 cover the general subject of sanitation.

16. *Geodesy.*

Three hours. One hour of recitation and five hours of computation. Third Term. Elective for students who have passed in 3 and 8 and Astronomy 4.

Problems in geodetic surveying. Only sufficient theory is given in this course for a proper understanding of the formulæ used in geodetic computations. Lectures and computations.

Professor HILL

18. *Roads and Pavements.*

Three hours. Third Term. Elective for Sophomores, Juniors, and Seniors.

Economics and location of country roads. Surveys, grades, drainage, and foundations. Construction of roads of earth, gravel, and broken stone. Economics and design of street pavements of asphalt, brick, cobble-stone, stone-block, and wood-block. Methods of testing road materials. Roads and pavements in foreign countries.

Professor BLANCHARD

[VI. Civil Engineering, continued.]

[19, 20, 21. *Laboratory Investigations.*]

Three hours. Through the year. Elective for students who have passed in Mathematics 13, Mechanics 4, and Drawing 6. Not offered in 1904-05.

Use and adjustment of instruments, testing materials, stereotomy.

Professor HILL

NOTE: For 1904-05 students in Civil Engineering will take Mechanical Engineering 40 and 41 in place of Civil Engineering 19 and 20.

25, 26, 27. *Lettering.*

One hour. Two hours of drafting. Through the year.

Offers sufficient practice in a few simple forms of letters to enable the students to do acceptable work in the drafting room.

Professor HILL

28. *Simple Framed Structures.*

Three hours. First Term. Elective for students who have passed in Mathematics 13, Mechanics 6, and Drawing 1 or 16.

The standard forms of simple roof trusses. Calculation of stresses due to dead, snow, and wind loads by analytical methods. Calculation of stresses in Pratt, Howe, Warren, and parabolic trusses due to dead, wind, uniform live, excess panel live, and locomotive wheel loads, by analytical methods. Miscellaneous trusses, skew bridges, influence lines, cranes, trussed bents, and towers. Lectures, recitations, and seminary work.

Professor BLANCHARD

29. *Structural Details.*

Three hours. First Term. Elective for students who have passed in Mathematics 13, Mechanics 6, and Drawing 1 or 16.

Riveted joints, roof details, tension members, combined direct and bending stresses, secondary stresses, columns under direct and eccentric loading. Details of wooden structures, plate girder, parabolic highway, pin-connected, and riveted Pratt truss railroad bridges. Construction of viaducts and elevated railroads. Steel mill-building and high building construction. Comparison of standard structural specifications. Lectures and computations.

Professor BLANCHARD

30. *Roof Design and Graphic Statics.*

Three hours. Six hours of drafting. First Term. Elective for students who are taking 28 and 29.

Graphic determination of center of gravity and moment of inertia of combinations of structural shapes. Determination of stresses in simple roof trusses by graphical methods. Moment and shear diagrams for the determination of stresses in plate girder bridges, Pratt trusses, and bridge trusses with inclined chords. Complete design with shop drawings of a fifty to seventy foot roof truss. Revision and discussion of checked drawings. Drawing and computations. Inspection trips.

Professor BLANCHARD

[VI. Civil Engineering, continued.]

31, 33. *Bridge Design.*

Four and three hours. Eight and six hours of drafting. Second and Third Terms. Elective for students who have passed in 28, 29 and 30.

Detail design, with shop drawings, of a heavy plate girder railroad bridge. General design and shop drawings of a two hundred foot parabolic highway bridge. General class design of a wooden trestle. Lectures on American and English shop practice, the esthetic design of bridges, design of stand pipes and elevated tanks, and American methods of erection of bridges and structures. Drawing, computations, field excursions, and seminary work or lectures.

Professor BLANCHARD

32. *Higher Framed Structures.*

Two hours. Second Term. Elective for students who have passed in 28.

Continuous bridges. Theorem of three moments, swing bridges, calculation of stresses in continuous and non-continuous centre bearing swing bridges, draw span machinery, cantilever bridges, and suspension bridges. General analysis of three-hinged, two-hinged, and fixed-end arches. Lectures, recitations, and seminary work.

Professor BLANCHARD

34. *Mineralogy.*

Three hours. Third Term.

Crystallography. Physical mineralogy; determination of minerals by physical properties. Geographical distribution of building-stones in the United States. Economic effect of minerals in building-stones. Weathering of building-stones. Methods of protection and preservation. Lectures and inspection of minerals in class.

Professor BLANCHARD

35. *Municipal Improvements.*

Three hours. First Term. Elective for Juniors and Seniors. Offered only if ten or more elect the course.

Economic and social aspects of sewerage, water works, pavements, etc.

Professor HILL

36, 37. *Masonry Structures.*

One hour. Three hours. One hour of recitation and four hours of drafting. Second Term. Elective for students who have passed in Mechanics 6 and Drawing 6.

Static and elastic theory of the masonry arch. Design of a stone arch. Theory and construction of concrete-steel structures. Determination of the forms and dimensions of stones in a plateband arch. Theory and design of retaining walls, and of earth and high masonry dams.

Professor BLANCHARD

[VI. Civil Engineering, continued.]

38. *Foundations.*

Two hours. Third Term. Elective for students who have passed in Mechanics 6.

Soundings and borings, foundation-beds, deposition of concrete under water, timber foundations, coffer dams, open caissons, Cushing cylinder piers, pile formulæ, driving and foundations, pneumatic caissons of wood and steel, open dredging, Poetsch freezing process, foundations in quicksand, foundations for high buildings, theory and design of piers for deep foundations.

Professor BLANCHARD

39, 40. *Engineering Jurisprudence.*

One hour. Second and Third Terms. Elective for Seniors who are studying Mechanical and Electrical Engineering.

Essential elements of a contract, the parties to a contract, considerations, bids and bidders, work for private parties and public work. Employment of engineers, liability of engineer as a professional man; when his functions are judicial; when a public officer. Real property, water rights, ownership, rights of way, boundaries, incorporeal rights, and franchises. Engineering specifications and accompanying documents.

Professor BLANCHARD

41. *Rock Excavation and Tunnelling.*

One hour. Second Term. Elective for students who have passed in 7 and in Mechanics 6.

Various ways of excavating rock and the principal methods of tunnelling.

Professor HILL

VII. COMPARATIVE ANATOMY

Professors MEAD, GORHAM, and WILLIAMS, Dr. SULLIVAN, Dr. FULTON, Dr. PERKINS, and Dr. PEGRAM

15, 1, 35. *Introductory Course.*

Three hours. Six hours of attendance. Through the year. Elective for Undergraduates.

Designed for purposes of general culture as well as for an introduction to further work in this department. Laboratory work in gross and minute anatomy and physiology, introductory to scientific methods, the structure and functions of animals, and the general principles of biology.

Professor GORHAM

[VII. Comparative Anatomy, continued.]

3, 4, 34. *Comparative Anatomy of Vertebrates.*

Three hours. Six hours of attendance. Through the year. Elective for Sophomores, Juniors, and Seniors, who have passed in 35.

Critical and comparative study of the vertebrate organs, with special reference to the structure of man. In addition to the regular lectures, occasional lectures by physicians and others who have given attention to certain special subjects. A limited number of students are permitted to attend the clinics at the Rhode Island Hospital.

Professor WILLIAMS

9. *Bacteriology.*

Three hours. Six hours of attendance. First Term. Elective for Juniors and Seniors.

Preparation and microscopic study of bacteria; the preparation of culture media, isolation, systematic study and determination of unknown species; qualitative and quantitative biological examination of water, milk, air, and soil; methods of determining pathogenic properties of bacteria; methods of sterilization and disinfection; special work on pathogenic forms.

Professor GORHAM

10. *Histology.*

Three hours. Six hours of attendance. Second Term. Elective for Juniors and Seniors who have passed in 35.

Microscopic anatomy of tissues.

Professor WILLIAMS

38. *Advanced Histology.*

Three hours. Six hours of attendance. Third Term. Elective for Juniors and Seniors who have passed in 10.

Dr. FULTON

2. *Comparative Anatomy of Invertebrates.*

Three hours. Six hours of attendance. Third Term. Elective for students who have passed in 35.

Laboratory course in the comparative anatomy of the lower animals.

Professor WILLIAMS

18,19. *Chemical Physiology.*

Three hours. Six hours of attendance. First and Second Terms. Elective for Juniors and Seniors who have passed in Chemistry 2.

The chemistry of the proteids, carbohydrates and fats; of salivary, gastric, and pancreatic digestion; of the blood, bile, and urine; the analysis of milk; toxicology.

Dr. SULLIVAN

[VII. Comparative Anatomy, continued.]

20, 21. *Physical Physiology.*

Three hours. Six hours of attendance. Third and First Terms. Elective for Juniors and Seniors who have passed in 19.

The physiology of muscle and nerve; the physics and physiology of the circulatory, respiratory, and alimentary systems; the causes and theories of sleep; the physiology of the special senses.

Dr. SULLIVAN

16, 17, 30. *Anatomy of the Nervous System.*

Three hours. Six hours of attendance. Through the year. Elective for Juniors and Seniors who have passed in 35. Not to be offered in 1905-06. Alternates with 31, 32, 33.

The gross anatomy and the microscopic structure of the nervous system in vertebrates, especially in man; phylogeny, embryology, and physiology of the nervous system, and special nerve methods in micro-technic.

Professor MEAD

[31, 32, 33. *Comparative Embryology.*]

Three hours. Six hours of attendance. Through the year. Elective for Juniors and Seniors who have passed in 35. Not offered in 1904-05. Alternates with 16, 17, 30.

Laboratory work. Designed to give a general idea of the principles of embryological development and of heredity, illustrating the fertilization and cleavage of the egg, metamorphosis, and organ formation.

Professor MEAD

25. *Biological Theories and Biological Problems.*

Weekly seminary. Through the year. Elective for Graduates.

Professor MEAD

27. *Bacteriology, advanced course.*

Through the year. Elective for Graduates. Laboratory work and seminary.

Professor GORHAM

28. *Physiology, advanced course.*

Through the year. Elective for Graduates who have sufficient knowledge of chemistry and physiology. Prescribed reading and seminary.

Dr. SULLIVAN

29. *Human Anatomy.*

Through the year. Elective for Graduates. Laboratory instruction.

A course in practical dissection. Students will also have an opportunity to attend certain operations at the hospital and to be present at autopsies.

Dr. PERKINS and Dr. PEGRAM

VIII. DRAWING

Professor RANDALL, Messrs. BROOKS and CLOUGH.

1. *Elementary Mechanical Drawing.*

Four hours. Two hours of recitation and six hours of drawing. First Term. Required of Freshmen who are candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Nature, care, and use of drafting instruments; plane problem construction; theory of orthographic projection; discussion, proof, and graphic solution of problems in descriptive geometry relating to the point, line, and plane.

Professor RANDALL, Messrs. BROOKS and CLOUGH

5. *Descriptive Geometry.*

Four hours. Three hours of recitation and three hours of drawing. Second Term. Required of Freshmen who are candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Line and surface generation and classification; discussion, proof, and graphic solution of problems in surface tangency; intersections and developments; presentation of principles involved in the solution of engineering problems.

Professor RANDALL

6. *Descriptive Geometry.*

Four hours. Three hours of recitation and three hours of drawing. Third Term. Required of Freshmen who are candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Intersections and developments; application of the principles of descriptive geometry in isometric drawing, in shades and shadows and perspective, in machine drawing, and in practical engineering problems.

Professor RANDALL

16. *Elementary Mechanical Drawing.*

Three hours. Six hours of drawing. First Term. Elective for Freshmen who are candidates for the degree of Bachelor of Philosophy, and for Sophomores, Juniors, and Seniors.

Nature, care, and use of drafting instruments; plane problem construction; elements of orthographic and isometric projection.

Professor RANDALL, Messrs. BROOKS and CLOUGH

[VIII. Drawing, continued.]

17. *Descriptive Geometry.*

Three hours. Two hours of recitation and two hours of drawing. Second Term. Elective for Freshmen who are candidates for the degree of Bachelor of Philosophy, and for Sophomores, Juniors, and Seniors who have passed in 1 or 16.

Theory of orthographic projection; discussion, proof, and graphic solution of problems relating to the point, the straight line, and the plane. A continuation of 16.

Professor RANDALL

18. *Descriptive Geometry.*

With the exception of courses 8, 11, and 30, the Undergraduate courses should be taken in the following order: 3, 1, 2, 9, 10, 12, 13, 14, 31, 15, 16, 17. Courses 8, 11, and 30 may be taken any time after the Freshman year. Courses 38, 39, 40, 41, 42, 43 are designed for students who are taking or who intend to take engineering courses. Courses 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 32, 33, 34, are designed for Graduates.

3. *Algebra.*

Four hours. First Term. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who did not present Solid Geometry and Plane Trigonometry for admission.

Professors CLARKE, DAVIS, and MANNING, Messrs. CURRIER and FREEMAN

1. *Geometry, Solid and Spherical.*

Four hours. Second Term. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who did not present Solid Geometry and Plane Trigonometry for admission.

Professor MANNING, Messrs. HART and FREEMAN

2. *Trigonometry.*

Four hours. Third Term. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who did not present Solid Geometry and Plane Trigonometry for admission.

Professor CLARKE, Messrs. CURRIER and HART

4. *Spherical Trigonometry.*

One hour. First Term. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who presented Solid Geometry and Plane Trigonometry for admission. Elective for students who have passed in 2 and who have not had Spherical Trigonometry.

Mr. HART

5, 6, 7. *Algebra.*

One hour. First Term. Two hours. Second and Third Terms. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who presented Solid Geometry and Plane Trigonometry for admission.

Professors DAVIS and MANNING, Mr. HART

8. *Determinants and Theory of Equations.*

Three hours. Second Term. Elective for students who have passed in 3 or 5, 6, 7.

Professor MANNING

[XIV. Mathematics, continued.]

38. *Algebra.*

Six hours. First Term. Required of candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Messrs. CURRIER, HART, and FREEMAN

39. *Trigonometry, Plane and Spherical.*

Six hours. Second Term. Required of candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Professor DAVIS and Mr. CURRIER

40. *Analytic Geometry.*

Six hours. Third Term. Required of candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Professor DAVIS, Messrs. CURRIER and FREEMAN

41. *Differential Calculus.*

Five hours. First Term. Required of candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Professor DAVIS and Mr. CURRIER

42, 43. *Integral Calculus.*

Three hours. Second and Third Terms. Required of candidates for the degree of Bachelor of Science in Civil Engineering, Mechanical Engineering, or Electrical Engineering.

Professor DAVIS and Mr. CURRIER

9, 10. *Analytic Geometry.*

Three hours. First and Second Terms. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who presented Solid Geometry and Plane Trigonometry for admission. Elective for students who have passed in 1, 2, and 3.

Professor DAVIS

11. *Modern Methods of Analytic Geometry.*

Three hours. Third Term. Elective for students who have passed in 10.

Professor MANNING

[30. *Solid Analytic Geometry.*]

Three hours. Third Term. Elective for students who have passed in 10. Not offered in 1904-05.

Professor MANNING

[XIV. Mathematics, continued.]

12. *Differential Calculus.*

Three hours. Third Term. Required of candidates for the degree of Bachelor of Arts or Bachelor of Philosophy who presented Solid Geometry and Plane Trigonometry for admission. Elective for students who have passed in 10.

Professor DAVIS

13. *Integral Calculus.*

Three hours. First Term. Elective for students who have passed in 12.

Professor DAVIS

14. *Applications of the Differential Calculus.*

Three hours. Second Term. Elective for students who have passed in 12 and 13.

Professor DAVIS

31. *Applications of the Integral Calculus.*

Three hours. Third Term. Elective for students who have passed in 13.

Professor MANNING

15, 16, 17. *Differential Equations.*

Three hours. Through the year. 15 and 16 are required of candidates for the degree of Bachelor of Science in Electrical Engineering. Elective for students who have passed in 13.

Professor MANNING

[18, 19, 20. *General Theory of Curves and Surfaces.*]

Three hours. Through the year. Elective for Graduates and approved Seniors. Not offered in 1904-05.

Professor MANNING

21, 22, 23. *Theory of Functions.*

Three hours. Through the year. Elective for Graduates and approved Seniors.

Professor MANNING

[24, 25, 26. *Differential Equations, advanced course.*]

Three hours. Through the year. Elective for Graduates who have passed in 23. Not offered in 1904-05.

Professor MANNING

27, 28, 29. *Advanced Algebra.*

Three hours. Through the year. Elective for Graduates and for approved Seniors.

Professor MANNING

[XIV. Mathematics, continued.]

[32, 33, 34. *Foundations of Geometry, Non-Euclidean Geometry, and Hyper-Space.*]

Three hours. Through the year. Elective for Graduates and for approved Seniors. Not offered in 1904-05.

Professor MANNING

Two or three of the groups of courses 18-34 are offered each year according to the requirements of the students. For those who have taken them all, other courses can usually be arranged.

XV. MECHANICAL ENGINEERING

Professors CLARKE and KENERSON, Messrs. BROOKS, APPLETON, and H. D. CADY

All courses in this department are required of candidates for the degree of Bachelor of Science in Mechanical Engineering. Though courses 10 to 16 are all open to Sophomores, Juniors, and Seniors, no more than two of them may be counted towards the degree of Bachelor of Arts or Bachelor of Philosophy.

A thesis is required before graduation of all candidates for the degree of Bachelor of Science in Mechanical Engineering. It may be based on extended independent study, on original experiments by the student, or on an original design of some complicated machine. In any case it must exhibit satisfactory ability in the student as an engineer.

10, 11, 12. *Wood-work.*

Three hours. Seven hours of attendance. Elective for Sophomores, Juniors, and Seniors.

Exercises in carpentry, wood-turning, and pattern-making.

Mr. CADY

13, 14, 15, 16. *Metal-work.*

Three hours. Seven hours of attendance. Elective for Sophomores, Juniors, and Seniors.

Exercises in chipping and filing, use of machine tools, forging and hardening tools, etc.

Mr. CADY

20, 21, 22, 23. *Kinematics.*

Three hours. Third, First, Second, and Third Terms. Elective for students who have passed in Drawing 10, 11.

Velocity ratios, rolling curves, cams, gearing, linkwork, belting, trains of mechanism and aggregate combinations; machine tools and the application of the foregoing principles to produce the desired relative motions of parts in such machines. Recitations, drawing, and the solution of problems. Three hours of drawing are considered the equivalent of one hour of recitation.

Mr. BROOKS

[XV. Mechanical Engineering, continued.]

24, 25, 26, 27. *Machine Design.*

Three hours. Six hours of attendance. First, Second, Third, and Third Terms. Elective for students who have passed in 20, 21, 22, 23 and Mechanics 3, 4, 6.

Principles of mechanics and strength of materials applied to the design of representative types of boilers, engines, and various mechanisms. Solution of problems illustrating the method of designing bolts and nuts, keys, journals and bearings, fly-wheels, valve gears, etc. Lectures, calculation, and drawing.

Mr. BROOKS

30, 31, 32. *Steam Engineering.*

Three hours. First, Second, and Third Terms. Elective for students who have passed in or are taking 33, 34, 35.

Practical applications of the principles of thermodynamics and mechanics to the production, transmission, utilization, and measurement of power. Valves and valve gears, and valve setting. Indicator practice and tests of various forms of steam engines, gas engines, etc. Standardization of auxiliary apparatus used in making the various tests. Boiler testing, flue gas and fuel analysis, etc. Largely a laboratory course.

Professor KENERSON

33, 34, 35. *Thermodynamics.*

Three hours. First, Second, and Third Terms. Elective for students who have passed in Physics 1, 2, 4 and Mathematics 12, 13, 14 or 41, 42, 43.

Principles of gases and vapors as applied to steam, gas, and other heat engines, air-compressor, refrigerating apparatus, etc. Discussion of the energy of fuel and the utilization of such energy for power purposes by means of various media. Laws of the relation of variations of pressure, temperature, and volume of such media. Design of proper cylinders for producing a desired amount of power. Principles of the injector and ejector.

Professor KENERSON

40, 41. *Materials of Engineering.*

Three hours. First and Second Terms. Elective for students who have passed in Mechanics 3, 4, 6.

Study of the sources, manufacture, and properties of the important materials used in engineering. Laboratory tests to determine the behavior of materials when subjected to tensile, compressive, and torsional stresses. Mixing and testing of cements and mortars. Preparation and examination of sections for the microscopical study of the structure of metals and alloys.

Professor KENERSON and Mr. APPLETON

[XV. Mechanical Engineering, continued.]

42. *Power Plant Engineering.*

Three hours. Third Term. Elective for students who have passed in 30, 31, 32.

Discussion of the relation and co-ordination of various parts of the complete power plant. Management and methods of determining efficiency. Selection of best equipment for solution of various engineering problems from manufacturers' catalogues and actual inspection. Lectures, recitations, tests, and tours of inspection.

Professor KENERSON

[43. *Engineering Laboratory, advanced course.*]

Three hours. First Term. Not offered in 1904-05.

Professor KENERSON

MECHANICS

Professor CLARKE

3, 4, 6. *Mechanics of Solids.*

Three hours. Through the year. Elective for students who have passed in Mathematics 9, 10, and 12, and who are taking Mathematics 13

Statics; dynamics, including rectilinear and curvilinear motion, virtual velocity, moment of inertia, work, energy and power, friction; strength of materials, including tension, compression, shearing, torsion, flexure, arches, and methods of graphical solution of problems.

7, 8. *Mechanics of Fluids.*

Three hours. First and Second Terms. Elective for students who have passed in 3, 4, 6.

Hydrostatics of liquids, including pressure of liquids in tanks and reservoirs, earth pressure and retaining walls, immersion and flotation; hydrodynamics, including steady flow, impulse, and resistance.

Courses 3, 4, 6, and 7, 8 cover essentially the same ground as Church's *Mechanics of Engineering*, supplemented by a large number of original problems illustrative of the principles under the different conditions which arise in their application.

XVI. PHILOSOPHY

President FAUNCE, Professors DELABARRE, EVERETT, JACOBS, and
MEIKLEJOHN

PHILOSOPHY AND PSYCHOLOGY

Some three-hour, three-term course in this department is required of every candidate for the degree of Bachelor of Arts or Bachelor of Philosophy. The courses in Education cannot be taken to satisfy this requirement.

[XVI. Philosophy, continued.]

19, 27, 43. *Logic.*

Three hours. Through the year. Elective for Sophomores, Juniors, and Seniors.

Aims, methods, and limitations of human thinking; a preparation for work in the sciences and in philosophy. First Term, general introduction and formal logic; Second Term, principles and methods of the natural sciences; Third Term, relations of science to philosophy; philosophical interpretation and criticism of the results of science.

Professor MEIKLEJOHN

2, 3, 4. *Psychology, introductory course.*

Three hours. Through the year. Elective for Juniors.

Main facts and laws of mental life, with particular attention to their arrangement in a scientific system, and to their philosophical bearing. The course furnishes a knowledge of mental law important for practical life, and serves also as a transition from the special sciences to philosophy.

Professor DELABARRE

20, 21, 22. *Psychology, advanced course.*

Three hours. Through the year. Elective for Seniors and Graduates.

A seminary for the discussion of important and interesting questions in psychology, especially the problems of hypnotism and psychical research.

Professor DELABARRE

29, 30, 31. *Experimental Psychology, introductory laboratory course.*

Three hours. Six hours of attendance. Through the year. Elective for Juniors, Seniors, and Graduates who have taken or are taking 2, 3, 4.

Description of the main lines and results of experimental research; demonstrations by the instructor or the class; training in the use of apparatus and in careful scientific observation and measurement.

Professor DELABARRE

39, 40, 41. *Experimental Psychology, advanced and original laboratory work.*

One to six hours. Two to twelve hours of attendance. Through the year. Elective for students who have taken 29, 30, 31. This course may be taken for more than six hours by Graduates, with double the number of hours of attendance.

The problems investigated vary and the course may therefore be taken two or more years in succession. The aim is to make original contributions to scientific knowledge in psychology and to publish the results.

Professor DELABARRE

[XVI. Philosophy, continued.]

8, 9, 10. *History of Philosophy.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates.

First Term, Greek philosophy; Second Term, mediæval and early modern philosophy; Third Term, recent and contemporary philosophy. The successive philosophical systems in their dialectical development and mutual relations; treatment not merely analytic and historical, but synthetic and constructive as well.

Professor EVERETT

5, 23. *Theoretical Ethics.*

Three hours. First and Second Terms. Elective for Seniors and Graduates.

Intended to aid in mastering the fundamental problems of life and character. First Term, a discussion of the nature and relations of ethics and an outline of the history of the chief ethical systems; Second Term, a critical study of the fundamental concepts of ethics with the aim of constructing a tenable theory of conduct.

Professor EVERETT

44. *Practical Ethics.*

Three hours. Third Term. Elective for Juniors.

Intended to apply ethical theory to the life of the individual, the family, and the state. Discussion of current problems, personal, industrial and social, from the ethical standpoint.

President FAUNCE

[26. *Outlines of the History of Religion.*]

Two hours. Second Term. Elective for Seniors and Graduates. Not offered in 1904-05.

Professor EVERETT

24. *Philosophy of Religion.*

Three hours. Third Term. Elective for Seniors and Graduates.

An investigation of the ultimate grounds of religious belief. Intended for students who have had previous philosophical training.

Professor EVERETT

14, 28, 42. *Philosophical Seminary.*

Three hours. Through the year. Elective for Graduates.

Lectures, written reports, and discussions on the more difficult problems of philosophy. Subject for 1904-05: Studies in Contemporary Philosophy.

Professor EVERETT

[XVI. Philosophy, continued.]

[17. *Discussions in Casuistry.*]

One hour. Second Term. Elective for Seniors and Graduates. Not offered in 1904-05.

Professor MEIKLEJOHN

33, 34, 35. *Kantian and Post-Kantian Philosophy.*

Three hours. Through the year. Elective for Seniors who have taken Philosophy 8, 9, 10, and for Graduates.

Kant's *Critique of Pure Reason* studied as the source of German Rationalism; the same line of thought traced in the *Critique of Practical Reason*, and in the works of Fichte, Schelling, and Hegel.

Professor MEIKLEJOHN

[6, 7, 11. *Advanced Logic.*]

Three hours. Through the year. Elective for Graduates. Not offered in 1904-05.

A seminary for the discussion of the more fundamental problems of logical theory. Reading, written reports, and discussions.

Professor MEIKLEJOHN

A Philosophical Club, consisting of Graduates, Seniors, and Juniors who are studying Philosophy, meets once a month for the reading of papers and for discussion. Though the organization is primarily in the hands of the students, the officers of instruction in the philosophical department and other persons interested in philosophy attend.

EDUCATION

Professor JACOBS

1. *History of Education.*

Three hours. First Term. Elective for Juniors, Seniors, and Graduates.

Education among the Greeks and Romans; rise and constitution of Universities; Erasmus and the Humanists; Comenius and the Realists; Rousseau and the Naturalists; development of educational psychology by Pestalozzi, Froebel, Herbart. The history of education considered from the point of view of the history of civilization.

2. *Critical Study of Modern Education.*

Three hours. Second Term. Elective for Juniors, Seniors, and Graduates.

Present theories as growing out of past theories; effectiveness of present American systems compared with that of past systems and that of present foreign systems; influences of education upon the state and society; current experiments; problems which an adequate theory of education must solve.

[XVI. Philosophy, continued.]

3. *Fundamental Principles of Education.*

Three hours. Third Term. Elective for Juniors, Seniors, and Graduates.

The meaning and aim of education; the function of education as a social institution; the sequence and coördination of studies; the principles of instruction; apperception; the steps in method; the use of the type in instruction; the training of the will; the principles of moral education.

Courses 1, 2, and 3 treat of education in its relation to the individual, and to the social and political whole, and their interest is therefore not limited to those who intend to teach. At the same time they form an introduction to the courses which follow. Those who intend to teach are advised to elect these courses during the Junior year.

4. *Psychology of Education.*

Three hours. First Term. Elective for Seniors and Graduates.

Theory and process of mental development, with special emphasis upon the period of adolescence. Psychology of method, and of the various studies and disciplines. Directions in which student and teacher may utilize a knowledge of the more fundamental activities of mind. An extended acquaintance with psychology, while useful, is not necessary to the profitable pursuit of the course.

5. *Hygiene of Education.*

Three hours. Second Term. Elective for Seniors and Graduates.

The hygiene of growth; physical culture and athletics; play and fatigue; sight and hearing; school diseases; school architecture, warming, ventilating and lighting; sanitation; school furniture; school programs.

6. *Practical Introduction to Teaching.*

Three hours. Third Term. Elective for Seniors and Graduates.

The method of the recitation. Management and discipline of classes. Observation of good teaching. Practical applications of method.

Teachers' Certificates. Courses 1-6 cover the requirements in professional studies for certificates of the First Grade in all states except where practice-teaching or experience is demanded. In Rhode Island the holding of a certificate is required of all teachers in schools supported in whole or in part by public money. Certificates of the First Grade are granted without examination to those who have completed these courses and hold a college degree. Due credit is also given for separate courses.

7, 8, 9. *Methods in Secondary School Studies and the Organization, Equipment, and Management of Secondary Schools.*

Three hours. Two hours of class-room attendance. Required of student-teachers. Elective for Graduates and experienced teachers. Each term may be elected separately.

[XVI. Philosophy, continued.]

Importance and meaning of secondary school studies; their organization into a curriculum; method as applied to each subject; the resources at the command of the teacher. The following studies receive special attention: First Term, Latin and Modern Languages; Second Term, History and English; Third Term, Science and Mathematics. For explanation of the work of student-teachers, see page 159.

10, 11, 12. *Training in Practical Teaching—Secondary Schools.*

Three hours. Through the year. Elective for Graduates who have completed the elementary courses in Education.

Practice teaching in the Providence high schools under experienced teachers. Observation, reports, conferences. Designed to train those who wish to become instructors in colleges, teachers or principals in secondary schools, or superintendents of schools. For explanation of the work of student-teachers, see page 159.

The practice teaching is done under the following supervising teachers: Charles E. Dennis, Ph. D., *Latin*; Victor Frazee, A. M., *History*; Charles E. Tilley, A. M., *Physics and Chemistry*; Grace H. Parker, A. B., *Natural Science*; Horace E. Jacobs, A. M., *Mathematics and Latin*; Florence J. Whiting, A. M., *Physics and Chemistry*; Sidney A. Sherman, Ph. D., *Mathematics and Civics*.

16, 17, 18. *Training in Practical Teaching—Grammar Grades.*

Three hours. Through the year. Elective for Graduates who have completed the elementary courses in Education and who are pursuing courses 13, 14, 15.

Practice-teaching in the Providence grammar schools under experienced teachers. Observation, reports, conferences. Designed especially to train those who wish to become grade teachers, assistant principals, principals of grammar schools, or superintendents; but also furnishes practical training for those who wish to teach in secondary schools. This course is open also to a limited number of Seniors by special permission. For explanation of the work of student teachers, see page 159.

The practice teaching is done under the following supervising teachers: Isaac O. Winslow, A. M., *Grammar Grades*; Mary Williams, *Eighth Grade*, and the Grammar Critics of the Providence public schools.

13, 14, 15. *Seminary in Educational Problems.*

Three hours. Two hours of class-room attendance. Required of student teachers. Elective for Graduates and experienced teachers. Each term may be elected separately.

The seminary meets on Saturday mornings. Reviews and discussions of recent publications; reports on special studies undertaken by members. Subjects vary from year to year. Those for 1904-05 are: First Term, Imitation; Social and ethical interpretations. Second Term, Recent types of educational theory. Third Term, an intensive study of some period in the history of education.

XVII. PHYSICAL TRAINING

Mr. MARVEL

For the physical training of the students excellent opportunities are offered by the Lyman Gymnasium. It is thoroughly equipped with baths, dressing rooms, bowling alleys, and all kinds of apparatus usually found in modern gymnasiums. It has also a swimming pool—the Colgate Hoyt Swimming Pool—seventy-five feet in length by twenty-five feet in width, with a capacity of seventy-five thousand gallons. The pool is made of enamelled brick and marble, and is supplied with a filter to ensure the clearness and purity of the water. All the gymnasium work is under the care of an experienced gymnasium director, who makes a thorough examination and measurement of each student on entrance, and at other times during the year by request. Special cases are referred to Dr. G. W. Gardner, the university physician. Such exercises are prescribed as may be necessary to give health, strength, and symmetrical development. No student is allowed to attempt any feat which is likely to result in injury. In the second term, every undergraduate student is required to attend gymnasium exercises three times a week. The instructor gives five minute talks on personal hygiene and exercise. The class work consists of setting-up exercises, developing exercises, calisthenics, the use of clubs, dumb-bells, wands, and single sticks, and general athletics. In the first and third terms, voluntary work is provided. Instruction is also given in wrestling, boxing, and swimming. A special effort is made to teach all students to swim. In all the work, the aim is to develop health, strength, and vitality.

All branches of athletics are under the management of the Brown University Athletic Association and are controlled by an Athletic Board composed of representatives of the Faculty, alumni, and undergraduates. The Faculty Athletic Committee has general oversight of the deportment and scholarship of the members of the various teams. Lincoln Field adjoins the gymnasium and is a convenient place of exercise for the class teams and the students in general. Andrews Field, which is a mile and a half from the University, offers the usual opportunities for all the University teams.

XVIII. PHYSICS

Professors BARUS, PALMER, and WATSON

1, 32, 4. *Elementary Physics.*

Three hours. Through the year. Elective for Undergraduates who have taken Mathematics 1, 2, 3, or its equivalent.

First Term, kinematics and dynamics; Second Term, optics; Third Term, electricity. Lectures, illustrated by experiments and the lantern. Weekly written exercises corrected in detail by the instructors. Designed for those who have had little previous training in physics.

Professor BARUS

[XVIII. Physics, continued.]

[2. *Molecular Physics.*]

Three hours. Second Term. Elective for Sophomores, Juniors, and Seniors who have passed in 1. Not offered in 1904-05.

Professor BARUS

[37. *Acoustics.*]

Three hours. Second Term. Elective for Sophomores, Juniors, and Seniors who have passed in 1. Not offered in 1904-05.

Professor BARUS

38. *Heat.*

Three hours. Second Term. Elective for Sophomores, Juniors, and Seniors who have passed in 1, 32, 4, and for engineering students with the special permission of the instructor.

Professor BARUS

NOTE: Courses 2, 32, 37, and 38, consist of lectures on the elementary principles of Molecular Physics, Optics, Acoustics, and Heat. One of these courses is given every year in connection with 1 and 4.

Graduates attending courses 1, 2, 4, 32, 37, 38, are held responsible for all the demonstrations, or for the full equivalent of either Watson's or Daniel's *Principles of General Physics*.

5, 9, 10. *Physical Measurements.*

Three hours. Six hours in the laboratory. Through the year. Elective for students who have passed in 1, 2, 4.

Elementary theory and practice of physical manipulation. Reports of experiments and solution of problems.

Professor PALMER

NOTE: Of the two following groups of courses—13, 14, 16 and 26, 27, 28—only one will be offered in any given year. In determining which shall be offered the preference of applicants will be considered.

13, 14, 16. *Mathematical Treatment of Dynamical Problems.*

Three hours. Through the year. Elective for Seniors and Graduates who have passed in 10 and Mathematics 16.

Lectures. First Term, discussion of the general principles of dynamics and the development of the general equations of motion; Second and Third Terms, application of these principles to special problems in thermodynamics and hydrodynamics.

Professor PALMER

26, 27, 28. *Mathematical Theory of Electricity and Magnetism.*

Three hours. Through the year. Elective for Graduates and Seniors who have passed in 10 and Mathematics 16.

Lectures. Includes a discussion of the more important problems of electrical science.

Professor PALMER

[XVIII. Physics, continued.]

17, 18, 19. *Advanced Laboratory Course.*

Three or six hours. Six or twelve hours of attendance. Through the year. Elective for students who have passed in 10.

For those who are already familiar with the use of physical apparatus and are capable of carrying on investigations more or less independently. Special problems and reference to original sources for methods of solution.

Professor BARUS, PALMER, and WATSON

NOTE: Of the two following groups of courses—20, 21, 48 and 29, 30, 31—only one will be offered in any given year. In determining which shall be offered the preference of applicants will be considered.

20, 21, 48. *Applied Harmonic Analysis.*

Three hours. Through the year. Elective for Seniors and Graduates who have passed in 1, 2, 4 and Mathematics 14, 15.

Importance of Fourier's method shown by examples drawn from the analytical theory of heat, from elastics, alternating electricity, and elsewhere; treatment by the aid of spherical harmonics, Bessel functions and Lamé functions.

Professor BARUS

29, 30, 31. *Physics, advanced course.*

Three hours. Through the year. Elective for Juniors, Seniors, and Graduates who have passed in Mathematics 12, 13, and 14.

Lectures on dynamics, potential elastics, hydrostatics, hydro-dynamics, viscosity, capillarity, electrostatics, magnetism, electro-magnetism, thermoelectrics, induction, Fresnel's optics, the electro-magnetic theory of light, thermal analytics, and thermo-dynamics. Completed in two years. Alternating, if desirable, with 20, 21, 48.

Professor BARUS

36, 39. *Precision Measurements in Photometry, Electricity, and Magnetism.*

Three hours. Six hours in the laboratory. First and Second Terms. Elective for students who have passed in 10 and Mathematics 13.

Professor PALMER

46. *Applied Electro-Chemistry.*

Three hours. Six hours in the laboratory. Third Term. Elective for students who have passed in 39 and 15

Professor PALMER

[XVIII. Physics, continued.]

NOTE: Courses 22-25 are courses in original research intended for qualified graduate students. They will be offered according to the needs of applicants. They occupy more or less time a week, according to the requirements of the students. Other courses in original research are offered to suit the special needs of advanced students.

22. *Behavior of Matter through Long Ranges of Temperature.*

Investigation of accurate methods and data in absolute pyrometry; determination of the high temperature constant of nonvolatile bodies with a view to the elucidation of fundamental questions in the physics of the earth's crust.

Professor BARUS

23. *Behavior of Matter through Long Ranges of High Pressure.*

Thermodynamics of the change of state from solid to liquid, due either to fusion or to solution, with especial reference to the continuity of solid and liquid, and to the location of the lower critical temperature.

Professor BARUS

24. *Absolute Viscosity of Solids as Compared with Liquids and Gases.*

Investigation of absolute data for the viscosity of solids.

Professor BARUS

25. *Physical Properties of the Iron Carburets.*

A consideration of the physical properties of iron, steel, and cast iron with reference to metallurgical and electro-technical problems.

Professor BARUS

Candidates for the degree of Master of Arts with a major in physics will be held responsible for at least one of the advanced courses in theoretical physics. The requirements for non-resident students taking their minor in physics are quite as advanced as for students in residence taking their major in physics. The department is able to offer every reasonable facility both for research work and for the study of the higher problems in physics; it is not able to offer much encouragement to those wishing to take degrees not in residence.

ELECTRICAL ENGINEERING

Professor WATSON

11. *Elementary Course.*

Three hours. First Term. Elective for students who have passed in Physics 4.

Definite instruction in methods of generating and utilizing electric currents; introductory to the technical courses, making with 12 and 15 a connected and comprehensive one-year course.

[XVIII. Physics, continued.]

12. *Dynamo-Electric Machinery.*

Three hours. Two hours of recitation, and two hours of laboratory work. Second Term. Elective for students who have passed in 11, and who have taken or are taking Physics 5, 9, 10, and Mathematics 12.

Technical study of theory and working of direct current dynamo-electric machinery.

15. *Dynamo-Electric Machinery.*

Three hours. One hour of lecture and four hours of laboratory work.

Third Term. Elective for students who have passed in 11 and 12.

Practical methods of operating and testing various sizes and types of standard dynamos and accessory apparatus. Lectures on alternating current machinery.

33. *Periodic or Alternating Currents of Electricity.*

Three hours. First Term. Elective for students who have passed in 15, and who have taken or are taking Mathematics 15.

A mathematical and graphical treatment.

34. *Utilization of Alternating Currents.*

Three hours. Second Term. Elective for students who have passed in 33. An extended treatment, for which courses 15 and 33 are preparatory.

35. *Alternating Current Machinery, laboratory course.*

Three hours. Six hours in the laboratory. Third Term. Elective for students who have passed in 34.

Testing of apparatus. The construction of apparatus may be undertaken as a minor portion of this course by suitably qualified students.

41. *Telephone and Telegraph Engineering.*

Three hours. Two hours of recitation and one hour in the laboratory.

First Term. Elective for candidates for the degree of Bachelor of Science in Electrical Engineering. May be taken with 11.

The laboratory work is the construction of electrical apparatus.

40. *Development and Scope of Industrial Electricity.*

Three hours. Second Term. May be taken with 12.

XX. ROMAN LITERATURE AND HISTORY

Professors HARKNESS and GREENE

While grammatical study and literary criticism receive attention in the courses of the Freshman year, the special aim is to enable the student to acquire facility in reading and to instruct him in the use of the Latin texts as a means of acquiring a knowledge of Roman history.

In the Sophomore courses, the literary side of the study is made prominent. A part of the time is occupied with a critical study of the poems; a part is devoted to rapid reading with a view to comprehending the spirit of the authors. Lectures are given by the instructor, and literary topics are assigned to the class for special study.

The advanced courses open to Juniors and Seniors relate to the development and history of Roman literature. Poetry and prose are discussed in alternate years. The aim of these courses is to give a connected and comprehensive view of the entire range of Roman literature. Lectures are given on the lives and writings of the authors, and characteristic selections are read. Topics in literary history and criticism are assigned to members of the class for special study and investigation.

Attendance, Examinations, and Standing

REGISTRATION AND ATTENDANCE

All undergraduate and resident graduate students who desire to attend the University during a given term are required to register at the Registrar's office before the first day of the term. Every undergraduate student who registers or changes his registration on or after the first day of any term is charged for such registration or change of registration a fee of three dollars. This fee may be remitted by the President or the Dean, on presentation of a satisfactory excuse.

Each student is expected to attend the daily chapel service and also every exercise in the several studies to which he is assigned.

EXAMINATIONS AND STANDING

Except in laboratory, seminary, and similar work, all classes are examined at the close of each term.

A student is not admitted to examination in a study in which his term work is unsatisfactory to the officer of instruction, or in which he has been absent from one-half of the class exercises.

The standing of students is indicated by letters as follows:

H is assigned to those whose work is of such excellence as to merit the designation of honor work.

C is assigned to those who have passed with credit.

P is assigned to those who have passed in the subject, but deserve no higher recognition.

F is assigned to those whose work during the term has been so unsatisfactory that, in the opinion of the instructor, they should not be allowed an examination, or to those whose examination has been so unsatisfactory that it should, in the opinion of the instructor, constitute a failure without regard to the work of the term, or to those who in the combined work of the term and the examination have failed to pass in the subject.

I is assigned to those whose work is incomplete, but satisfactory so far as done.

L may be assigned, in courses which are to be continued the following term, to those students whose work, while not an unequivocal failure, is

of a low grade. This mark will be changed to either P or F as the student's subsequent work may determine.

Abs is assigned to those who are absent from examination, unless *F* has already been assigned.

Unless a student's absence from examination is excused by the Committee on Absences, the mark *Abs* will be changed to *F*.

A student who receives the mark *F* must pursue the subject again with a succeeding class, or if the instructor allows, under a tutor appointed by the head of the department; or, if the failure is in an elective course, he may take as a substitute some other course approved by the Committee on Admission to Advanced Standing.

Examinations other than those regularly appointed are not held except in case of (1) candidates for advanced standing whose examinations are authorized by the Committee on Admission to Advanced Standing, (2) students whose absences from the regular examinations have been excused by the Committee on Absences, (3) students who have been allowed to pursue, under appointed tutors, studies in which they have failed at a regular examination.

A student who wishes to take a special examination must obtain from the Registrar a written authorization, for which he shall pay a fee of two dollars, unless this is remitted by the President or the Dean, and must then arrange with the officer of instruction for the examination. In case of failure the authorization must be signed by the tutor, in case of absence, by the chairman of the Committee on Absences.

A student who at the close of a term has failed in three or more studies, counting for more than eight hours of work a week, cannot be again registered without special action of the Faculty.

Term Honors in any department are awarded to those who receive the mark *H* in a given term.

Final Honors in any department are awarded at the completion of the studies leading to a baccalaureate degree to those who have secured (1) term honors in the department in courses aggregating eighteen or more term hours, (2) a mark of *C* or *H* in eighty-five per cent. of all their courses of study. In any department, however, certain specified courses may not be included in those counted for final honors. The names of all students awarded Final Honors are printed in the Commencement Program and in the Annual Catalogue.

A record is kept of the attendance of every student of the University, and of his proficiency in his several studies. The standing of every undergraduate student is determined at the close of each term. A report is sent to the parent or guardian of every undergraduate student containing the record of all absences from required exercises, indicating his standing in each of his studies for the term, and announcing his deficiency in any study or studies if such deficiency exists.

Expenses

UNIVERSITY DUES

Upon registration every student is required to present a guarantee covering all his college expenses, signed by his parent or guardian, or some other responsible person.

Term bills are due at the beginning of each term, and must be paid or their payment secured on presentation.

THE DUES OF EVERY UNDERGRADUATE CANDIDATE FOR A DEGREE are as follows:

Tuition, \$35 a term; \$105 a year.

General incidentals, \$16 a term; \$48 a year.

The incidental expenses are for the printing of programs, examination papers, and the like, the use of the library and the gymnasium, heat for these buildings and for the dormitories and recitation rooms, and the wages of servants to care for the same.

Every undergraduate candidate for a degree pays, upon matriculation, a fee of \$5.

Every member of the Senior class pays, upon graduation, a fee of \$8 for his diploma and other extra expenses connected with graduation.

For laboratory dues, see next page.

Students leaving college before the middle of a term, unless for misconduct or failure in scholarship, pay in tuition, incidentals and laboratory fees (exclusive of breakage, which is charged at cost) half the usual term dues. Students leaving college on account of misconduct or failure in scholarship receive no reduction.

Students taking the first degree in less than four years of regular work pay an additional fee of \$25.

SPECIAL STUDENTS in the University pay, as a rule, full tuition and incidentals, but the charge is proportionately less when students are admitted to courses amounting to less than fifteen hours of class attendance a week.

THE FEES FOR GRADUATE STUDENTS in residence are:

Tuition, \$50 a term; \$150 a year.

Examination for the degree of MASTER OF ARTS, \$15.

Examination for the degree of DOCTOR OF PHILOSOPHY, \$25.

For laboratory dues, see next page.

Candidates for advanced degrees who are taking less than the regular amount of work, and special graduate students, pay in proportion to the number of hours taken.

Students taking the second degree in less than five years of regular work pay an additional fee of \$25.

A candidate in residence for the degree of MASTER OF ARTS who has paid full tuition for one year may, if necessary to the attainment of his degree, continue his studies for one year more without additional charge.

A candidate in residence for the degree of MASTER OF ARTS who, without remitting his studies, becomes a candidate for the degree of DOCTOR OF PHILOSOPHY is credited with whatever tuition he has already paid, in case his previous work is allowed to count toward the higher degree.

A candidate for the degree of DOCTOR OF PHILOSOPHY who has paid full tuition for two years may without additional charge continue his studies for two years more if necessary to the attainment of his degree.

The fees for a non-resident candidate for the degree of MASTER OF ARTS are:

Registration fee, \$25.

Tuition, \$10 a term, \$30 a year.

Examination fee, \$15.

For laboratory dues, see below.

A non-resident candidate is entitled, upon payment of the above fees, to pursue one three-hour course at the University. For each additional course a proportional fee is charged.

A non-resident candidate who has paid tuition for two years may, if necessary to the attainment of his degree, continue his studies for one year more without additional charge, except for work taken in class-room as stated in the preceding paragraph.

Graduate students not candidates for a degree pay at the same rates as special students.

SPECIAL LABORATORY FEES are charged as follows:

Students in Chemistry who take courses 1, 2, or 3 are charged \$3 a term in addition to the regular charges for tuition.

Students who take advanced courses in Chemistry are charged \$5 a term for a three-hour course and \$10 for a six-hour course in addition to the regular charges for tuition.

Graduate students pay the same laboratory fees as undergraduate students.

The above fees cover the cost of ordinary chemicals, but students are charged extra for breakage and for special chemicals.

Students who take courses in the Physical Laboratory pay \$5 a term for a three-hour course (six hours of attendance).

Students who take Shop-Work pay \$5 a term for a three-hour course (six hours of attendance).

Students in Botany pay \$3 a term extra.

The charge for a laboratory course in Comparative Anatomy is usually about \$5.

ESTIMATE OF ANNUAL EXPENSES

The following is an approximate estimate of the annual expenses of a student occupying (with a room-mate) a dormitory room, not including outlay for clothes and travelling or other strictly personal expenses.

	Medium	Maximum
Tuition.	\$105 00	\$105 00
Incidentals.....	46 00	46 00
Room rent, including heat and service	60 00	212 50
Board (40 weeks).....	150 00	280 00
Books and laboratory expenses.	30 00	75 00
Total.....	\$391 00	\$718 50

Matriculation fee (first year), \$5.

Graduation fee (fourth year), \$8.

Board is not furnished by the University; but the BROWN UNIVERSITY CO-OPERATIVE REFECTORY, organized and controlled by students, furnishes its shareholders with board at cost. At present the price is \$3.75 a week.

Students needing to increase their incomes through their own exertions find in the city numerous opportunities for doing so, by giving private instruction, by teaching in evening schools, and by other occupations not inconsistent with their college duties.

Dormitory Accommodations

In the College Dormitories there are in all one hundred and forty-six single rooms and thirty-four suites.

The rooms in Hope College, University Hall, Slater Hall, and the College Street House are rented unfurnished. Those in Maxcy Hall contain all necessary furniture, occupants providing nothing except bed-linen and towels.

The prices given in the following tables include rent, heat, and service for the college year. In the College Street House lighting is included. In Slater Hall, University Hall, Hope College, Maxcy Hall, and Caswell Hall there are meters for each room and the occupants are charged for the amount used each term.

Caswell Hall, the new dormitory is situated on the southeast corner of Lincoln Field fronting on Thayer street. On the first three floors of the north and south divisions are suites provided with private baths, etc.; the rest of the building contains single rooms. All the rooms are furnished by the University. Further particulars can be obtained by addressing the Registrar.

Each student renting a room must sign a contract therefor in the form given below, on which surety may be demanded, binding him to pay or see paid the rent of the room through the entire year. Where two students rent a room together, each must sign a contract for half the room expenses. This obligation is not impaired by the student's removal from the University, whatever the cause of such removal.

The following is a contract between Brown University, party of the first part, and the undersigned, party of the second part. I hereby engage room No. in ; the same not to be occupied by any other person without consent of the party of the first part, and I bind myself to pay or cause to be paid to the Registrar of Brown University the entire rent, including heat and service, amounting to \$ for the college year beginning September, 190 .

It is a part of this agreement that I shall be held responsible for all damage or defacement of such room or its furniture, ordinary wear excepted; also that disuse of the room by me on account of illness, or in case registration is refused me owing to low standing or bad conduct, does not impair the obligation of this contract.

Signed.

This day of

190 .

Students who desire to retain the rooms rented by them during the present year may do so by signing new contracts for the coming year. These contracts must be filed with the Registrar before 4 P. M. on May 12th, 1905.

All rooms not signed for on the above date will be disposed of at a drawing on May 26th at 4.30 P. M. Men intending to enter college can arrange to be represented at the drawing by notifying the Registrar.

Not more than two students are allowed regularly to occupy a room or suite. When the University holds full contracts for a room, the tenant or tenants may admit to the regular use of the room in the daytime one or two students, but not more than two. The names of any such sub-tenants must be reported to the Registrar as soon as the arrangement for sub-tenancy is made. For each sub-tenant the University makes an extra charge of one dollar a term for service. This sum is paid to the University by the tenant in chief if there is but one; if there are two each pays half.

The following conspectus shows the rent and location of each dormitory room.

Financial Aid to Students

The aid which Brown University is able to offer students of limited means is granted under three conditions: (1) the recipient must be a candidate for a degree, having been fully admitted to the Freshman class or to advanced standing ; (2) the recipient must be of good moral character and maintain a creditable standing in his studies; the aid is withdrawn if the student is placed under college discipline or fails to maintain good scholarship; an average of *C* on the marking system now in use is expected; (3) the recipient must be in need of the financial assistance rendered.

The administration of the scholarship system is in the hands of a Committee of the Faculty, annually appointed by the Corporation for that purpose. The Dean of the University is the executive of the Committee. He is also charged with the administration of the Service system.

Applications for aid for a given academic year should be filed with the Dean before May 1st of the preceding year. Action upon all applications is taken by the Committee before July 1st.

The aid rendered is of three kinds: (1) Loans; (2) Fellowship, scholarship, and aid funds; (3) Work for which wages are paid.

A. LOAN FUNDS

The University has two funds available for this purpose:

I. The Alumni Loan Fund, now amounting to about \$4,300. This Fund was established by the Alumni Association at the Commencement of 1900 by a vote transferring to the Treasurer of the University the fund formerly known as the Brown Loyalty Fund, to be used as a Loan Fund for students. The principal of this fund is loaned at interest, to be repaid as agreed upon in each instance.

II. A fund of several hundred dollars, which is loaned in small amounts without interest, for short periods, to students unexpectedly needing temporary assistance.

B. FELLOWSHIP, SCHOLARSHIP, AND AID FUNDS

GRAND ARMY OF THE REPUBLIC FELLOWSHIP

In 1891 the Grand Army of the Republic, Department of Rhode Island, gave to Brown University the sum of ten thousand dollars, to be forever known as the Grand Army of the Republic Fellowship Fund. Only the

income of the Fund can be used. This income is for the aid of a graduate of Brown University, of acknowledged excellence in scholarship and character, who before accepting this fellowship must be enrolled as a candidate for the degree of Doctor of Philosophy, unless he has already received that degree, and who will reside at Brown University and devote his entire time to the pursuit of advanced liberal study. The intention is that the income for any year shall all go to the same person, except in case of his death, or his resignation or forfeiture of the fellowship, when a successor may be appointed for the remainder of the year. Holders of the fellowship are appointed by the President of the University, subject to the approval of the Board of Fellows; but the descendants of Union Veterans of the Civil War of 1861-65 are always to be preferred when the other qualifications of candidates are equal. No consideration touching the political or religious preferences of candidates can ever enter into the appointments. Appointments to the fellowship are regularly made for one year, but incumbents of special diligence or ability may be re-appointed. The President is authorized to make for the reception and use of the income from this Fund such other conditions, not inconsistent with the above, as he may from time to time deem wise and proper. Applications for this fellowship must be made in writing on blanks furnished by the Dean of the Graduate Department, and must be in the hands of the President not later than the fifteenth of May. The Grand Army of the Republic Fellow for 1904-05 is

ARTHUR UPHAM POPE, A. B.

PHILADELPHIA ALUMNI FELLOWSHIP

This is a Fund of ten thousand dollars, which the Philadelphia Alumni Association of Brown University will soon render available. Its general purpose will be to assist graduate students of special ability in pursuing advanced studies at the University.

TEACHING FELLOWSHIPS

In addition to the foregoing, a number of Teaching Fellowships have been established, information regarding which will be furnished by the President.

FUNDED SCHOLARSHIPS

These are funds, presented to the University at various times, the incomes of which are awarded annually according to the conditions attaching to each fund. The scholarships established when the rate of interest was higher than at present, and the cost of education less, were each of \$1,000.

There are now seventy-six scholarships of this amount, each with a designated name and yielding the beneficiary \$45 annually; with the exceptions indicated, they bear the names of their founders.

THE ELEVEN NICHOLAS BROWN SCHOLARSHIPS.

THE FOUR UNIVERSITY SCHOLARSHIPS.

THE PRESIDENT'S (SEARS) SCHOLARSHIP.

THE SIX ALVA WOODS SCHOLARSHIPS.

THE THURSTON SCHOLARSHIP, founded by the Hon. Benjamin F. Thurston, LL.D., of the class of 1849.

THE RUFUS BABCOCK SCHOLARSHIP, founded by Mrs. Caroline Vassar Babcock Jones, in memory of her father, the Rev. Rufus Babcock, D.D., of the class of 1821.

THE JAMES FLETCHER BLACKINTON SCHOLARSHIP, founded by Mrs. Mary D. Blackinton, in honor of her husband, James Fletcher Blackinton, of the class of 1847.

THE FIVE WILLIAM A. WHITE SCHOLARSHIPS, founded by Mrs. Abby S. A. White, in honor of her husband, William A. White, of the class of 1857.

THE RICHARDS SCHOLARSHIP, founded by the Rev. William Coolidge Richards, of the class of 1837.

THE SAMUEL WHITE DUNCAN SCHOLARSHIP, founded by Mrs. Mary Duncan Harris.

THE S. DRYDEN PHELPS SCHOLARSHIP, founded by the Rev. S. Dryden Phelps, D. D., of the class of 1844, the income to be given each year to some student who is preparing for the Baptist ministry.

THE BENJAMIN HUTCHINSON JUDAH SCHOLARSHIP.

The following scholarships are of larger amounts:

THE TWO GEORGE J. SHERMAN SCHOLARSHIPS, paid from a fund of two thousand, five hundred and sixty-five dollars.

THE BARTLETT SCHOLARSHIP, of four thousand dollars, founded by Mrs. Elizabeth Slater Bartlett; the income to be "devoted to the support of one or more students needing pecuniary aid, and giving promise, by studious aim and by character and scholarship, of rising to distinction and usefulness."

THE GLOVER SCHOLARSHIP, of five thousand dollars, founded by Henry R. Glover, "in memory of his father, Samuel Glover, of the class of 1808, and of his brother, Samuel Glover, Jr., of the class of 1839."

THE REBECCA A. WHEELER SCHOLARSHIP, of fifteen hundred and seventy one dollars, founded by the lady whose name it bears; the income to assist some worthy student, preferably a candidate for the Baptist ministry.

THE SCHOLARSHIP OF THE CLASS OF 1838, of thirty-eight hundred dollars.

THE JOSEPH CHARLES HARTSHORN SCHOLARSHIP II, of two thousand dollars.

THE BANIGAN SCHOLARSHIPS I AND II, of three thousand dollars each, founded by the late Joseph Banigan of Providence; the income as far as necessary to be used each year to defray the tuition of two students of the University.

THE GEORGE IDE CHACE SCHOLARSHIP, of five thousand dollars, founded by Professor George Ide Chace, the income to be assigned each year by the Faculty to some member of the Senior class needing the money, who shows "marked ability, exemplary industry, generous aspirations, and irreproachable character."

THE ABBY WHEATON CHACE SCHOLARSHIP, of four thousand dollars, also founded by Professor George Ide Chace; the income to be assigned yearly by the Faculty to some member of the Junior class needing the money, who shows "marked ability, exemplary industry, generous aspirations, and irreproachable character."

If either in the Senior or in the Junior class there chances to be no person fulfilling the requirements of either of these two scholarships, the proceeds of the scholarship for that year must, under the proper direction, be appropriated to the purchase of books for the library of the University.

THE JOHN L. LINCOLN SCHOLARSHIP, of twenty-five hundred dollars, and the TRUMAN BECKWITH SCHOLARSHIP of twenty-five hundred dollars, founded by the late Abby G. Beckwith.

THE THAYER SCHOLARSHIP, founded by Edward C. Thayer, in honor of his father, Joseph Thayer, of the class of 1815, the income to be for the education of any young man or woman a resident of Uxbridge, Mass., endorsed by the selectmen and superintendent of schools there, needing pecuniary aid and giving promise by character and scholarship of a life of usefulness. If there is no applicant from Uxbridge, the income may go to any applicant from Massachusetts who fulfills the conditions.

THE WALTER G. WEBSTER SCHOLARSHIPS, founded by the Rev. Walter G. Webster, of the class of 1878; the income to go each year to two young men, members of the Freshman class, holding the full diploma of the Classical High School of the city of Providence and duly matriculated for the degree of Bachelor of Arts; "the nomination to rest with the Principal of said school, and to be made on the basis of character and scholarship, due regard being had to the need of such assistance."

THE THREE S. W. MARSTON SCHOLARSHIPS, founded in the name of his father by Mr. Edgar L. Marston of New York. Each of these scholarships yields two hundred dollars a year. The first scholarship is open to any graduate of LaGrange College who may be recommended by the President of that institution. The second is open to any graduate of William Jewell College under similar conditions. The third is open to any graduate of the Central High School in St. Louis, Mo., subject to the recommendation of the Principal.

The following scholarships have been in part established:

THE TWO GEORGE HALE BACON MEMORIAL SCHOLARSHIPS, paying each recipient \$150 a year, founded by George A. Bacon in the name of his father. The awards are to be made only to young men in need of assistance and to be given solely on grounds of scholarship and personal character, no other consideration to receive any weight whatever.

AID FUNDS

These are two in number, and their income is divided into scholarships of varying amounts, which are awarded under the general conditions applicable to all scholarships:

The Aid Fund, established by friends of the University in 1868, and now amounting to \$9,300;

The Daniel W. Lyman Fund for students, established by the late Daniel W. Lyman, and now amounting to \$72,250.

UNIVERSITY SCHOLARSHIPS

In addition to the income of the Scholarship and Aid Funds, the Advisory and Executive Committee of the Corporation appropriates each year a large sum of money from the Common Fund of the University for the assistance of students. This amount at present exceeds \$15,000, and is used for establishing of University Scholarships, which are of three grades:

(1) A small number yielding each \$50 a term or \$150 a year, paying the whole college bill for tuition and incidentals, awarded to a few Juniors and Seniors of especially high scholarship.

(2) A number yielding each \$35 a term or \$105 a year.

(3) A number yielding each \$20 a term or \$60 a year, used in part to supplement the smaller endowed scholarships, and also for those needing relatively less assistance.

The University Scholarships are taken directly from the college treasury and therefore use funds which would otherwise be available for other college purposes. It is expected, therefore, that the holders of them will regard them as in a certain sense a loan, and will at some subsequent time after graduation return to the treasury the amount awarded, to be used for the increase of the permanent scholarship funds, or that they will in some other way contribute to the endowment of the University.

C. SERVICE

The University is able to give employment to a number of students as monitors, assistants in the library and laboratories, members of the choir, and clerks in the Registrar's office. Not more than two hours a day are required of any student, except in specified cases, and the compensation is made at definite rates. At present about \$6,000 a year is appropriated for service, and employment is given to about eighty students, who receive each amounts varying from \$20 to \$40 a term. The University also coöperates with the Young Men's Christian Association in efforts to secure employment for students from business houses and residents of the city.

Medical Care

Any student suffering from illness is expected to go at once to the office of the University Physician, Dr. George W. Gardner, or, if necessary, to request Dr. Gardner to come to his room. When called to see students, the duty of the University Physician is to make one call for diagnosis and prescription at the expense of the University. For continued attendance, students will make their own arrangements with Dr. Gardner or some other physician. Free attendance in the Rhode Island Hospital is secured to officers and students of the University by the following provisions:

The University owns two free beds in the Hospital, to the occupancy of which the President of the University has the right of appointment. The first of these, THE CHARLES SMITH BRADLEY FREE BED, was established in 1872 by a payment to the hospital of four thousand dollars by the late Judge Bradley, a member of the Board of Fellows, thereby endowing a free bed "under the control of the President of Brown University for the time being, for the benefit of any officer or student of that institution who may have occasion for it." The second, THE GEORGE IDE CHACE FREE BED, was established by a payment to the hospital of a like sum by the late Professor George Ide Chace; this foundation gives to the President of the University "the right to nominate and send to said hospital a patient, being a proper subject for treatment in said hospital, according to the rules of the institution to occupy a bed in said hospital, and to receive the usual care, and medical, surgical and other attendance, and medicines and board, free of charge."

Social and Religious Life

Chapel exercises are held in Sayles Hall every morning on week days at nine o'clock. At the same hour the Women's College has its chapel service in Pembroke Hall. The President usually conducts the exercises at Sayles Hall, and the Dean of the Women's College conducts the service at Pembroke Hall. Attendance is required of undergraduate students.

During the winter a series of vesper services is held in Sayles Hall on Wednesday afternoons at five o'clock, open both to students and to the public. The preachers last year were as follows: Rev. George H. Ferris, A. M., of New Haven, Conn.; Rev. Alexander McKenzie, D. D., of Cambridge, Mass.; Rev. William S. Rainsford, D. D., of New York City; Professor Gerald Birney Smith, A. M., of the University of Chicago; Rev. Donald Sage MacKay, D. D., of New York City; Rev. Charles E. Jefferson, D. D., of New York City; Rev. George Hodges, D. D., dean of the Episcopal Theological School, Cambridge, Mass., and President W. H. P. Faunce, D. D.

The Brown Union has been organized to promote the social and religious life of the University. Its membership includes students and graduates. It has its home in Rockefeller Hall, which was built especially for its occupancy, and the immediate direction of which is vested in a Board of Management, consisting of the president of the Union and four members appointed by the Advisory and Executive Committee of the Corporation. The Hall provides ample accommodations for the Brown University Young Men's Christian Association, which conducts voluntary Bible classes for students, and also maintains an employment bureau and supports philanthropic work in the city. Rooms are also provided for other religious, literary, and social organizations of the students.

Student Advisers

Under the system of student advisers instituted in the University, every member of the Freshman class is assigned to some member of the Faculty who serves throughout the year as a special counsellor to that student. In the assignment of students to advisers the preferences of both are consulted when practicable. The system is designed to further personal intercourse between student and instructor, and to afford the student means of obtaining unofficial advice on any matter connected with his college life. The student is at liberty at any time to seek the counsel of his adviser.

Teachers' Bureau

The Brown University Teacher's Bureau has been established for the purpose of communicating with institutions desiring to employ graduates of Brown who are qualified to teach. To this end it solicits correspondence with those who are seeking well equipped teachers, and invites inspection of the list of such teachers now registered. It advises graduates of Brown who wish its assistance to register at once, and, if possible, to meet the Secretary in a personal interview. It offers to undergraduates information as to subjects in which there is a demand for teachers, as to positions commonly open to recent graduates, and as to the preparation usually required. No charge for the services of the Bureau is made either to students or to schools.

It is the further purpose of the Bureau to foster co-operation between the University and all graduates engaged in the work of education. As far as possible an accurate register of the addresses and the positions of all such graduates is kept.

The office of the Secretary is in the Administration Building, room 10.

Libraries, Laboratories, and Museums

LIBRARIES

The libraries of the University consist of about one hundred and fifty thousand volumes. They comprise the main library, which occupies the Library Building, the gift of John Carter Brown of the class of 1816; the John Carter Brown Library, with its own building, recently given to the University; and the department libraries, which are placed in connection with the various laboratories and seminary rooms.

THE MAIN LIBRARY is constantly increased with reference to the different courses of study, while at the same time there is kept in view the development of a library of general culture for the use of the students. On the first two floors are arranged the books most in use, the entire west wing of the library on the first floor being given up to History, the north wing to Periodicals, Fine Arts and Social Science, and the east wing to Literature. The second floor is devoted to Philosophy, Theology, Geography, Antiquities, Education, Law, the Sciences, the Arts, Philology, and, lastly, the Wheaton Collection of International Law, given by William V. Kellen, of the class of 1872, in honor of Henry Wheaton, of the class of 1802. In a separate room on this floor is shelved the Harris Collection of American Poetry. This collection, founded by Albert G. Greene and extended by C. Fiske Harris, was bequeathed to the University by the Hon. Henry B. Anthony. It numbers over six thousand bound volumes, being perhaps the largest collection in the world devoted to the subject. A fund, given by Samuel C. Eastman of the class of 1857, in memory of the founder of the collection, Albert G. Greene, of the class of 1820, provides for its regular increase. On the third floor is the special room devoted to the Rider Collection of Rhode Island History. This collection, formed by Sidney S. Rider and presented to the University by Marsden J. Perry, has no rival in extent and rarity of manuscript and printed material bearing on the history of the state. On this floor are kept certain other collections, besides many thousand volumes of works infrequently consulted, arranged according to the classification adopted for the lower floors. To all but the two special collections the students have free access.

On the first floor, upon tables in the central reference room, are kept the latest numbers of the standard periodicals, American and foreign. In the wall cases are books of reference; various shelves, particularly those on the central table, are devoted to books reserved by the departments. In this room are the Select Library of attractive reading,

the Loan Desk, where books are charged and returned, and the desk of the Reference Librarian, whose duty is to advise and assist students in their use of the books whether for class work or for private reading and research.

The library funds amount to over seventy-seven thousand dollars. Of this sum ten thousand dollars constitutes the Gammell Fund for the purchase of books relating to the history of the United States; ten thousand dollars, the Olney Fund for the purchase of plants and botanical books; ten thousand dollars, the Diman Memorial Fund for the purchase of works on mediæval and modern history; and ten thousand dollars, the Banigan Fund for the purchase of books on mediæval and church history. The remainder includes several smaller special funds and the Library Fund proper.

The following persons are entitled to the use of the Library without expense: the members of the Corporation and Faculty; other college officers; graduates residing in the State of Rhode Island; donors to the funds of the University to the amount of five hundred dollars, residing in the State of Rhode Island; graduate and undergraduate students; and also other persons on whom the Corporation or the Library Committee may from time to time confer the privilege.

The Library is open during term time from 9 A. M. to 11 P. M. on week days, and from 2 to 11 P. M. on Sundays; during vacations from 10 A. M. to 4 P. M. on week days.

The JOHN CARTER BROWN LIBRARY, given to the University by the Trustees under the provisions of the will of the late John Nicholas Brown, A. M., of the class of 1885, is a collection of about 15,000 volumes relating to the history of North and South America during the colonial period. The larger part of the books, many of which are of great rarity and value, were printed before the year 1800, and contain the earliest published accounts of events connected with the history of the discovery, exploration, and colonization of the western hemisphere. This collection, well known for many years as the most valuable private library of Americana in existence, was begun by John Carter Brown of the class of 1816, and after his death was greatly enlarged by his widow and by his sons, the late John Nicholas and Harold Brown.

The John Carter Brown Library occupies a building erected for it at the southeastern corner of the middle campus. It is open daily from 9 A. M. until 5 P. M., and the books may be consulted by all properly qualified students or investigators, upon application to the Librarian. In the main hall of the building there are a number of exhibition cases in which are shown the rare books, engravings, and manuscripts belonging to the collection.

THE GERMANIC DEPARTMENT LIBRARY is contained in the two rooms of the department in Sayles Memorial Hall. It was purchased in Germany by the late Professor Williams in the name of the principal donor, the

Hon. Hezekiah Conant. The library now contains over six thousand carefully selected volumes, including editions of all the important writers of German literature; a large collection of Germanic philology; the leading German literary and philological periodicals; many works upon German history, the history of German literature, and German law, art, palæography, and geography. The Library is especially rich in works of the Middle High German period, and in Goethe and Schiller literature. It possesses many works of art which illustrate the subjects taught—bronzes, framed engravings, and volumes of plates. The rooms are open from 9 A. M. to 12:30 P. M., from 2 to 6 P. M., and from 8 to 9:30 P. M.

THE CLASSICAL DEPARTMENT LIBRARY is contained in the room in Sayles Hall, occupied by the Albert Harkness Classical Seminary, named in honor of its founder, Professor Albert Harkness, Ph. D., LL. D. It consists of fifteen hundred volumes, purchased with funds contributed by friends of the University interested in classical studies. The most important collections of Greek and Roman authors, many of the best commentaries, reference books, and similar aids are to be found here. The seminary is made the centre for advanced study and research in the classical languages and literatures. Though primarily intended for graduates, the seminary is open to such of the undergraduates as are qualified to profit by its advantages. The room is open from 9 A. M. to 10 P. M.

THE ROMANCE DEPARTMENT LIBRARY is a collection of about one thousand volumes for the use of advanced students in the Romance languages. It is contained in a room in Sayles Hall. This room is open daily, and also on Tuesday, Wednesday, and Thursday evenings.

THE BIBLICAL DEPARTMENT LIBRARY consists of a reference collection of about one thousand volumes, provided for the use of students in the Biblical department. It is kept in Sayles Hall. It includes a valuable collection of Semitic books presented by Mr. Jacob Shartenberg of Pawtucket. A number of Semitic, Biblical, and general religious journals are kept on file. The room is open from 9 A. M. to 12 M., from 2 to 5 P. M. and from 7 to 9 P. M., except Wednesday and Saturday afternoons.

THE BIOLOGICAL DEPARTMENT LIBRARY is contained in the rooms of the department of Comparative Anatomy in Rhode Island Hall. It is a collection of more than twelve hundred volumes, to which additions are constantly made. More than forty current periodicals bearing upon the work of the department are regularly received. The rooms are open from 9 A. M. to 4 P. M.

THE EDUCATIONAL DEPARTMENT LIBRARY is contained in the seminary room of the department, in the Administration Building. The library contains over one thousand volumes, chiefly text-books of recent publication. The room is open to all students interested in education and to teachers and friends of education in the city and state.

THE WOMEN'S COLLEGE LIBRARY and reading room occupy two rooms in Pembroke Hall. The library contains about two thousand volumes, all recently purchased, and has a complete card catalogue. The aim of the collection is to furnish a reference library of standard literature, with special regard to the courses offered, thus forming for students of the Women's College a convenient and valuable adjunct to the University Library.

Most of the other departments of the University have special collections of books for seminary and advanced laboratory work. The most important of these belong to the departments of Astronomy, Botany, Chemistry, Economics, Engineering, English, Mathematics, and Physics. There are also practically at the service of the students of the University the six collections of books named below. These comprise, with the University Library, about four hundred thousand volumes, exclusive of pamphlets and manuscripts.

THE PROVIDENCE PUBLIC LIBRARY welcomes all students of Brown University, upon the same conditions as other residents of the city, to use its carefully selected collection, which comprises more than 114,000 volumes. It is situated at the corner of Washington and Greene streets. It includes various special collections and departments. Its principal rooms are open regularly from 10 A. M. to 9 P. M.; on Sundays and legal holidays from 2 to 9 P. M. Among its special departments may be mentioned the Harris Collection on Slavery and the Civil War, on the third floor; the Educational Study-room and the "Standard Library" of best literature, on the second floor; and the Reference Department on the ground floor, which is open until 10 P. M. About 600 periodicals, serials, and annuals (of which about 270 are the best known weeklies, monthlies, and quarterlies), are currently received. The Library of the Rhode Island Medical Society is on the third floor. The library staff will be glad to be consulted with respect to books in any of the departments of University study, and to prepare lists of references in connection with any of the special topics under consideration.

THE LIBRARY OF THE PROVIDENCE ATHENÆUM is a library of general literature. It numbers 66,000 volumes, and the reading room receives upwards of 200 papers and magazines, including New York, Boston, and Providence daily papers, and American, English, German, French, and Italian weeklies, magazines, and reviews. In bound sets of periodicals and in books on art this library is especially rich. Professors or teachers, non-residents of the city, may become annual subscribers on the payment of four dollars in advance, and any student of Brown University whose family does not reside in the city, or who may obtain the privilege from the board of directors, may become a subscriber for three months on the payment of one dollar. The annual subscription for residents is seven dollars and a half. The Athenæum is open during the college year from 9 A. M. to 10 P. M. on week days.

THE LIBRARY OF THE RHODE ISLAND HISTORICAL SOCIETY is situated on Waterman street, next door to the University Library building. The library of the society comprises 20,000 bound volumes and 40,000 valuable unbound volumes and pamphlets. Through the courtesy of the Society the collection is made accessible, free of charge, to members of the University. It offers special facilities for thorough research not only in all subjects relating to the history of Rhode Island, but also in genealogy, local history, and general American history. Its library has recently been enriched by a special bequest of books on the English and American drama, and by a collection of works on early American travels and ethnology. The collection is open from 9 A. M. to 4 P. M. on week days.

THE LIBRARY OF THE RHODE ISLAND MEDICAL SOCIETY, which may be found in the Providence Public Library building, on Washington street, comprises 20,000 volumes and numerous pamphlets upon medical science, including biology, physiology, physiological psychology, hygiene, and other subjects the study of which is pursued in the University. About 175 medical periodicals are currently received. Arrangements are easily made whereby any student can, without cost, enjoy the privileges here offered. This collection is open daily, from 10 A. M. to 6 P. M.

THE STATE LAW LIBRARY, a collection of 27,000 volumes, may be consulted in the Providence County Court House, at the corner of Benefit and College streets, between the hours of 9 A. M. and 5 P. M. on week days. It is accessible to all students, and for certain lines of University study is invaluable.

THE STATE LIBRARY, located in the State House, is accessible to the public from 9 A. M. to 5 P. M.; on Saturdays from 9 A. M. to 12 M. This library contains a large collection of official documents of the United States and of the several states, as well as general works pertaining to history and political science.

LABORATORIES

THE LADD ASTRONOMICAL OBSERVATORY is equipped with a Saegmuller-Brashear equatorial of twelve inches aperture, which is supplied with a filar micrometer, spectroscope and other attachments; two transit instruments, one of which can be used as a zenith telescope; a chronograph; two astronomical clocks; several sextants and chronometers; recording meteorological apparatus; and various minor instruments. The equipment is available for illustrating the general courses in astronomy and for practical use in the applied courses open to undergraduates and graduates.

The Observatory furnishes constant time-signals to the Rhode Island Electric Protective Company, by which they are distributed to its patrons. Routine observations for determining clock errors, and for pressure, tem-

perature, humidity, and precipitation are made throughout the year. Special observations are also made as opportunity offers.

THE PHYSICAL LABORATORY, in which all the courses of instruction offered by the department of Physics are conducted, is in Wilson Hall, which was specially designed and constructed for this purpose. Twelve laboratory rooms are available for the experimental study of physics, each room being fitted for the investigation of a particular branch of the subject or for the arrangement of classes according to proficiency. Brick piers support instruments requiring great steadiness, and the magnetic rooms are as free as possible from iron and other disturbing influences. Several rooms on the ground floor are devoted to a laboratory for electrical engineering, and are well provided with machinery and instruments. Equipment for certain special investigations recently undertaken has been placed at the disposal of the department by friends of the University. Efforts have been made to develop the facilities for high-temperature and high-pressure work, in the directions specified in courses 22 and 23. The cabinets are well supplied with apparatus both experimental and demonstrative, and frequent additions are made as necessity requires. In all such cases new property is selected with a view to use in the students' laboratory as well as in the lecture-room, and to the exclusion of merely exhibitional apparatus. The department is in possession of a large assortment of historical and other photographs and lantern slides, as well as of cage models illustrating the propositions in pure and applied physics.

THE ANATOMICAL LABORATORIES are in Rhode Island Hall, and consist of private rooms for instruction, a laboratory for graduate students, a seminary room, a physiological laboratory, a laboratory for bacteriology and histology, a laboratory for neurology and embryology, and the large laboratory for elementary anatomy and the comparative anatomy of vertebrates and invertebrates. All the anatomical laboratories are equipped with reagents and apparatus. The very large collection of zoological material, the anatomical and histological preparations of the museum, the anatomical collection of the Rhode Island Medical Society, and rich material frequently contributed by the United States Fish Commission from the deep sea dredging excursions, are always accessible to the students. Abundant living material is also readily available, since the laboratory is situated near the salt water and within a few miles of two floating laboratories located on opposite sides of Narragansett Bay.

THE CHEMICAL LABORATORIES are in Rogers Hall, which was erected expressly for the department of chemistry.

The inorganic laboratory is supplied with work-tables and lockers furnishing accommodations for about two hundred and fifty students working by detachments. Adjacent are the balance room, and the furnace room.

The organic laboratory is fitted with work tables for about fifty students. Each table has arrangements for gas, high pressure water supply, etc.

The room has excellent hoods, besides large and accessible shelf room for apparatus and supplies. The library of the chemical department is here.

THE BOTANICAL LABORATORY is in the basement of Maxcy Hall. The main lecture room and laboratory will accommodate thirty-seven students. A somewhat smaller room adjoining is used for a histological laboratory and will accommodate twelve students. Instruments and certain materials are provided. The Herbarium, on the same floor, is convenient for consultation and for systematic study of native and foreign plants.

THE PSYCHOLOGICAL LABORATORY occupies rooms in Wilson Hall. It possesses a considerable variety of apparatus for the study of sensations, the determination of discriminative sensibility, the measurement of the duration of mental processes, the detection of physiological accompaniments of changes in consciousness, the study of temperament, and other fields of research. This equipment is especially well adapted for the illustration and demonstration of the main results of experimental work in psychology. The department aims to make contributions to knowledge on this subject by original research; and the apparatus already possessed, and that which can be supplied by the University workshops or by purchase, together with what can be prepared in the laboratory itself to meet the demands of particular problems, offer good facilities for such work.

THE MECHANICAL ENGINEERING LABORATORIES, library, and drawing room are situated in the new Engineering Building. This building is 72 by 84 feet, three stories high, and is designed so that a later addition of nearly equal size may be made to provide for all the engineering departments. The first floor is used as an engineering laboratory. On the second floor are four large recitation rooms and a laboratory containing the lighter experimental apparatus. The third floor is used entirely for drafting.

The laboratory for testing the strength of materials contains a 400,000-pound Riehle testing machine of special design for testing large specimens in tension, compression, and cross bending; a 50,000-pound Riehle testing machine; a machine for testing full sized timber and steel beams; a 50,000-inch-pound Olsen torsion testing machine; a machine for testing by repeated stresses; a Riehle cement testing machine; and the necessary auxiliary apparatus such as micrometers, extensometers, etc.

The steam engineering laboratory contains a cross-compound condensing Corliss engine, size 10 and 18 by 30, specially designed for experimental purposes, together with various smaller engines, steam pumps, injectors, and the necessary apparatus for testing the same. A boiler of 250 pounds working pressure, arranged for either natural or mechanical draft, has recently been installed, and the enlarged central heating plant of the University is used as a basis for numerous tests by the students.

The laboratory of metallography is equipped with apparatus for investigating the nature and structure of alloys. In connection with the laboratory is a properly equipped photographic dark room. The apparatus includes polishing machines for preparing specimens, an excellent Leitz microscope with accessories, including photographic apparatus, a thermo-electric pyrometer and lantern apparatus.

The department is provided with necessary small apparatus such as indicators, tachometers, gauge tester, steam and fuel calorimeters, gas analysis apparatus, facilities for meter testing, etc. Models for the illustration of the various courses are constantly being made or acquired. The apparatus for the new laboratories is being selected with a view to the practical demonstration of fundamental principles of engineering, which, if thoroughly mastered, will enable the student to apply his knowledge to the varied and special cases that arise in the work of the engineer.

THE MECHANICAL ENGINEERING SHOPS are situated in Rogers Hall and are well equipped for purposes of instruction. The wood working shop is provided with large and small lathes, circular and band saws, buzz planer, vertical boring and mortising machines, and ample benches and bench tools. The metal working shop is provided with engine lathes of good sizes, hand lathes, planer, shaper, milling machines, large and small vertical drills, universal grinder, surface grinder, cutter and reamer grinder, drill grinder, power hack saw, and a small foot press. There is also a blacksmith's outfit for forming and dressing tools, and facilities for hardening and tempering. Power is furnished by two ten-horse-power electric motors.

THE MECHANICAL DRAWING ROOMS are on the top floor of the Engineering Building. These rooms are large and well lighted and accommodate two hundred and fifty students. About two hundred and twenty-five valuable models in wood and metal have been collected. Many of these are mechanical in nature and are extensively used in the courses. The department possesses a dark room, exposure frame, and washing tank, for preparing and developing blue-prints. Connected with the main drawing room is a library and reading room in which may be found such books of the University Library as relate to drawing and allied subjects, together with other books which are owned by the department. A limited number of sets of drawing instruments have been provided for the use of deserving students who would otherwise be unable to pursue desired courses in drawing.

THE DRAFTING ROOMS of the department of Civil Engineering are located on the second floor of the Engineering Building. These rooms have desks for about fifty students. Numerous large photographs of bridges and viaducts and models of harbor improvements hang on the walls and facilitate the instruction in design.

MUSEUMS

THE MUSEUMS OF ZOÖLOGY AND ANTHROPOLOGY are in Rhode Island Hall, and are open to the public daily. Students desiring to use the collections for the purpose of study or investigation receive every encouragement, the aim being to make the museums not mere exhibition rooms, but places for work. The zoölogical and anatomical collections of the University form the Jenks Zoölogical Museum. The Museum of Anthropology contains a collection of articles of dress and rare implements from foreign countries, and a valuable collection of stone implements of aboriginal American races, including those of Rhode Island.

THE HERBARIUM, situated in Maxcy Hall, consists mainly of various collections which have been given or bequeathed to the University. Those of Colonel Olney, Mr. Bennett, Dr. Bailey, Miss Stout, and Mr. Brownell are the most prominent. The Olney collection is particularly rich in the genus *Carex*. The Stout collection consists mostly of ferns. In addition to these collections many specimens have been obtained by exchange, purchase, and small donations. The Olney, Bailey, and Stout collections are nearly all mounted; the remainder are mainly unmounted. These collections are merged in one general herbarium and deposited in cases. They were roughly estimated, a few years ago, to contain in all about 40,000 sheets, representing specimens from more than 60,000 localities. In 1902 Dr. Bailey's second herbarium was purchased by friends and presented to the University. This is now being arranged and mounted, and will ultimately be merged in the general collection. To these is added the nucleus of a collection of seeds.

The arrangement of orders and genera of the flowering plants is at present according to Bentham and Hooker's *Genera Plantarum*; of the ferns according to Hooker's *Synopsis Filicum*; of the mosses according to Eaton's list. All are soon to be arranged according to Engler and Prantl's *Natürliche Pflanzenfamilien*.

Many portraits of famous botanists hang on the walls of the Herbarium room. A portrait of Colonel Stephen T. Olney, the founder of the department, has been presented to the Herbarium by his niece, Mrs. F. H. Peckham.

THE MUSEUM OF FINE ARTS occupies the first floor of Manning Hall. It contains plaster casts of rare excellence, chiefly from works of classical sculpture, which are of great value in illustrating ancient history, biography and art. It also contains a few bronzes and oil paintings.

The portraits, of which the University possesses a large number of valuable specimens, are mostly hung in Sayles Memorial Hall. The collection receives accessions every year. It now includes portraits of the University's principal benefactors, of many of its former officers, and of many other distinguished persons, Americans and foreigners, the history of Rhode Island being especially well represented.

Arrangements with Other Institutions

THE RHODE ISLAND SCHOOL OF DESIGN, which was incorporated in 1877 and opened in Providence in 1878, is an institution of large and rapidly increasing importance for the education of artisans and artists in the principles and processes of art, and for the general advancement of education in art by the exhibition of works of art and art studies, and by lectures on art. Its school buildings and museum are near the University grounds, and its collections are open daily to the public free of charge. Through its exhibitions there is opened to students an important means of culture.

The Corporation and Faculty of Brown University have agreed with the authorities of the Rhode Island School of Design upon a plan of coöption in accordance with which certain courses at this school will be open to students of Brown University, and will be counted towards a University degree. A description of these courses and a statement of the conditions under which they may be elected will be found in the lists of studies given under the Departments of Art and Drawing, on pages 64 and 81.

Students from the Rhode Island School of Design may be admitted to any classes in Brown University for which they are found to be prepared, and Brown University will give certain special courses for the benefit of classes from the Rhode Island School of Design.

THE NEWTON THEOLOGICAL INSTITUTION has entered into an agreement with Brown University whereby work done in the University, for which a mark of "C" is awarded, or upon which the student passes an examination satisfactory to the Newton Faculty, will be credited toward graduation in the Theological course as follows:

Hebrew 1-3, 16-18,	132 hours
Biblical Literature in English 1-6,	112 "
New Testament Language 1-6,	108 "
Public Speaking,	36 "
Total	<hr/> 388 hours

The whole number of prescribed hours in the Theological course at the Newton Theological Institution is 1,620.

THE AMERICAN SCHOOL OF CLASSICAL STUDIES AT ATHENS has had relations with Brown University ever since the foundation of the school in 1881. Professor Albert Harkness was a member of the first committee of five persons appointed by the Archæological Institute of America to establish

this school for the benefit of graduates of American colleges desiring to pursue advanced classical studies in Greece. Until 1902 the privileges of the school were secured to graduates of Brown University by the payment of an annual contribution of \$250, and this sum was obtained through subscriptions. In 1902 a number of the friends of the University, in recognition of the sixtieth anniversary of the graduation of Professor Harkness, united in contributing the sum of \$5,555, which was paid to the Treasurer of the American School of Classical Studies at Athens to establish a fund to be known forever as "The Albert Harkness Fund for the benefit of Brown University." The privilege of free tuition in the School at Athens for all adequately prepared graduates of Brown University is henceforth secured by the establishment of this fund, and no further annual payments will be required. The superior opportunities offered to American college graduates by the School at Athens are too well known to need recounting; but any who may desire detailed information regarding the school can obtain it by applying to Professor William Carey Poland, a former Director of the school, and now a member of the Managing Committee.

THE SCHOOL COMMITTEE OF THE CITY OF PROVIDENCE, by a special agreement, appoints student-teachers to places in the Providence High Schools. Appointments are made from members of the Senior class who have pursued undergraduate courses in Education. These student-teachers are of two types. Those of the first type—of whom there are at least six (three of each sex)—are occupied in the schools each day for somewhat more than half the usual school session. They receive a salary of four hundred dollars a year from the city. Those of the second type are allowed to teach and observe about five hours a week. They have considerably more freedom in the choice of subjects and of hours than those of the first type. They receive no remuneration from the city. An unusual opportunity is thus afforded student-teachers to gain at the same time a thorough knowledge of the theory of education and practical experience in the art of teaching. In making appointments to places as teachers of the lowest grade in the Providence High School, preference is given to those who have successfully accomplished the course as student-teachers. In this respect student-teachers of the second type have the same status before the committee that makes appointments as those of the first type.

The practice teaching in the Providence High Schools is done under the following Supervising Teachers: Charles E. Dennis, Ph. D., *Latin*; Victor Frazee, A. M., *History*; Charles E. Tilley, A. M., *Physics and Chemistry*; Grace H. Parker, A. B., *Natural Science*; Horace E. Jacobs, A. M., *Mathematics and Latin*; Florence J. Whiting, A. M., *Physics and Chemistry*; Sidney A. Sherman, Ph. D. *American History and Civics*.

In a similar way student-teachers are appointed to places in the Providence Grammar Schools. They receive a salary of three hundred

dollars a year from the city. If they are appointed, after completing the course in training, as regular teachers in the city schools, they have credit for experience which entitles them to receive five hundred dollars for their first year of service. They have also certain other advantages.

A limited number of Seniors or Graduates who are pursuing courses in Education are allowed to observe and teach in the Grammar Schools of the city in a way similar to that provided for student-teachers of the second type in high schools.

The practice teaching in the Providence Grammar Schools is done under the following supervising teachers:—

Isaac O. Winslow, A. M., *Grammar Grades*; Mary Williams, *Eighth Grade*; and the Grammar Critics of the Providence Public Schools.

Premiums, Prizes, and Honors

THE PRESIDENT'S PREMIUMS, derived from the income of a fund presented to the University in 1843 by President Wayland, are awarded each year to those members of the Freshman class who upon special examination are found to have attained the highest excellence in the studies required for admission to the University in Greek, Latin, and French. First and Second Premiums are awarded in each of these studies.

The examinations for the premiums deal with the general principles and laws of the languages involved rather than with irregularities and exceptions. Great importance is attached to the pupil's familiarity with the subject-matter of the works read, and to his ability to translate with accuracy and facility into clear, appropriate, and idiomatic English.

The examination in Greek occurs on the second Saturday of the first term, that in Latin on the third Wednesday, and that in French on the fourth Wednesday.

The award of these premiums in 1904 was as follows:

In *Greek*, the First Premium to EARLE WINFIELD PECKHAM, instructed in the Classical High School, Providence.

The Second Premium to RALPH PHILIP BOAZ, instructed in the Classical High School, Providence,

In *Latin*, the First Premium to RALPH PHILIP BOAZ, instructed in the Classical High School, Providence.

The Second Premium to EARLE WINFIELD PECKHAM, instructed in the Classical High School, Providence.

In *French*, the First Premium to RALPH PHILIP BOAZ, instructed in the Classical High School, Providence.

A collateral First Premium for an examination of equal merit was awarded to MARY EVELYN WHELAN, instructed in the Fall River High School.

The Second Premium to EARLE WINFIELD PECKHAM, instructed in the Classical High School, Providence.

THE HARTSHORN PREMIUMS, three in number, derived from the income of a fund of one thousand dollars, presented to the University in 1872 by Joseph C. Hartshorn, A. M., of the class of 1841, are awarded to those members of the Freshman class who upon examination are found to excel in the mathematical studies required for admission. The examination occurs on the third Saturday of the first term.

The award of these premiums in 1904 was as follows;

The First Premium to JAMES ALEXANDER HALL, instructed in the Classical High School, Providence.

The Second Premium to LOUIS JOHN GILLESPIE, instructed in the High School, Manchester, New Hampshire.

The Third Premium to WADE CLARENCE West, instructed in the State Normal School, Glenville, West Virginia.

THE CARPENTER PRIZES FOR ELOCUTION, derived from the income of a fund established in 1867 by Thomas Carpenter and Lydia Carpenter, are awarded annually to the three members of the Sophomore class to whom are assigned, respectively, the first, the second, and the third rank of excellence in elocution.

The selections declaimed may be either prose or verse. They must be approved by the Professor of Public Speaking, with whom competitors must enter their names not later than the first day of February. A preliminary contest for the purpose of selecting the speakers takes place in the latter part of the winter term; all arrangements for it are in the hands of the Professor of Public Speaking.

The committee of award consists of five members—the Professor of Public Speaking, who is the chairman, two persons selected by the Corporation, and two persons selected by the Sophomore class during the first term of the year. No one who is or has been a member of the class is eligible. The contest for 1905 will be held in Manning Hall on May 9th.

In 1904 the prizes were awarded as follows:

The First Prize to FRANK DAVID MCINTYRE

The Second Prize to LESTER LEOPOLD FALK

The Third Prize to HARRIS MERRILL BARBOUR

THE HICKS PRIZES FOR EXCELLENCE IN DEBATE, established by the Hon. Ratcliffe Hicks, of the class of 1864, are annually awarded as follows:

Two prizes of forty dollars each, one in each of the two series of contests for the selection of the representatives of the University in the inter-collegiate debates. The prize is, in each instance, given to the man showing the greatest ability both in the preliminary trials and in the final trial. In awarding the prize, regard is given to thought, style, and delivery. The judges are three, appointed by the Debating Union.

In 1904 a prize was awarded to

GLEN WILLIAM WOODIN

A first prize of thirty dollars and two prizes of twenty dollars each, to the students showing the greatest ability in a public debate between the representatives of the Junior and Sophomore classes. Each class is represented by three men, whom a committee appointed by the President of the University chooses from the preliminary contestants at least a

month before the public debate. This committee also determines the subject and makes the necessary arrangements. The judges in the public debate are three, one appointed by the President, and one by each group of competitors. The prizes are awarded irrespective of the decision upon the debate as a whole. The first prize may be withheld if no one is adjudged to deserve it. In making the award, regard is given to thought, style, and delivery. In 1905 the public debate will be held on May 23.

In 1904 these prizes were awarded as follows:

The First Prize to LESTER LEOPOLD FALK, 1906

A Second Prize to WILLIAM GRANVILLE MEADER, 1905

A Second Prize to FRANK CLIFTON HULSE, 1905

THE DUNN PREMIUM. The income of a fund of one thousand dollars, presented to the University in 1872 by pupils and friends of the late Professor Robinson Potter Dunn, D. D., is given, at the end of the Junior year, to the student having the highest standing in the courses in rhetoric, English composition, and public speaking. In making the award, regard is given to the number of such courses taken as well as to the rank attained in them.

In 1904 the premium was awarded in equal parts to

CHARLES STUART MITCHELL
and
IRVING LANOQUETTE PRICE

THE CARPENTER PREMIUMS, two in number, are derived from the income of a fund established in 1867 by Thomas Carpenter and Lydia Carpenter. They are assigned at the end of the Senior year to the two members of the Senior class who, "already on scholarships, shall, in the judgment of the Faculty, unite in the highest degree the three most important elements of success in life—ability, character, and attainment."

In 1904 the premiums were awarded to

HOWARD FARMAN HART
and
RALPH HERVEY BEVAN

THE HOWELL PREMIUM. The income of a fund amounting to one thousand dollars presented to the University in 1867 by the late Gamaliel Lyman Dwight, is given at the close of the second term of the Senior year to the student who, "having a good record of deportment, has the highest rank in Mathematics and Natural Philosophy." To be considered a candidate for the premium a student must, each term from the Freshman year to the end of the second term in the Senior year, select at least one of the elective studies offered in Pure or Applied Mathematics.

In 1904 the premium was awarded to

HOWARD FARMAN HART

THE CLASS OF 1873 PRIZE. A fund of one thousand dollars, completed in 1898, has been presented to the University by the class of 1873, on the condition that its income should be used as a prize for an essay. The prize is annually offered for competition to members of the Senior class, the subject assigned being of a historical nature one year and of a philosophical nature the next. The subjects are assigned by the respective departments. In 1903-04 no award was made. For 1904-05 there has been assigned a philosophical subject: "Conscience, its Origin, Development, and Significance."

THE FOSTER PREMIUM IN GREEK is derived from the income of a fund of three thousand dollars bequeathed to the University in 1880 by the Hon. Lafayette Sabine Foster, LL.D., of the class of 1828. In accordance with the terms of the donor's will, the income of this fund is to be "annually paid to that scholar of the institution who passes the best examination in the Greek language, the examination to be made in the first, third, and twenty-fourth books of Homer's Iliad or in the Oration on the Crown by Demosthenes."

The next examination, open to the members of the Senior class, will be held early in May, 1905. Candidates will be examined in the Iliad.

In 1904 the premium was awarded to

GUY BLANDIN COLBURN

In 1903 a coördinate prize was awarded to

RUBY MARION ATWOOD

THE LUCIUS LYON PREMIUMS IN LATIN are derived from the income of a fund of five thousand dollars presented to the University in 1893 by Mrs. Caroline L. Lyon, in memory of her husband, Lucius Lyon, of the class of 1844. Five-tenths of the income each year forms the first premium, three-tenths the second, and two-tenths the third. Any part of the income not needed in any given year must be added to the fund. The premiums are awarded as the result of a special examination held during the last term of the Senior year. The examination may relate to any or all of the following subjects: the Latin language, Roman literature, Roman history. The President of the University and the head of the Latin department prescribe for admission to the examination such conditions as in their judgment will secure the best results.

In 1904 the premiums were awarded as follows:

The First Premium to GUY BLANDIN COLBURN

The Second Premium to MORRIS BRAUN

The Third Premium to EDMUND KINGSLEY ARNOLD

THE WILLIAM GASTON SCHOLARSHIP. This fund of five thousand dollars was established in 1899 by the widow and children of the late Hon.

William Gaston, LL. D., of the class of 1840. Its income is awarded annually by the Faculty upon absolute merit, without reference to financial condition.

For 1904-05 the scholarship has been awarded to

GLEN WILLIAM WOODIN

THE GASTON PRIZE MEDAL FOR EXCELLENCE IN ORATORY. From the income of a fund of three thousand dollars established in 1894, as a memorial to the late Hon. William Gaston, LL.D. of the class of 1840, a gold medal is annually awarded to the member of the graduating class who delivers the best original oration in English. The orations are not to exceed fifteen hundred words. In order to compete for the prize a student must deposit with the Registrar a type-written copy of his oration, signed with an assumed name, one month before the public competition. From these orations a committee appointed by the President of the University selects not more than six for delivery. The committee of award in the final contest consists of three members appointed by the President. In making the award regard is given to thought, style, and delivery. The winner of the medal is entitled to deliver an oration at Commencement.

The competition in 1905 will be held on February 21st. In 1904 the successful competitor was

ALBERT BENJAMIN WEST

APPOINTMENTS FOR COMMENCEMENT. At every commencement five members of the graduating class deliver original orations in English of not more than fifteen hundred words each. One of these is the winner of the Gaston medal; the other four are selected by the Faculty from nominations by the heads of departments. The basis of selection is scholarship, ability to write, and ability to speak. The students thus appointed confer with the Professor of Rhetoric, who advises with them in regard to the choice and treatment of subjects, and with the Professor of Public Speaking, who trains them in the delivery of their orations. Before Commencement each speaker must hand to the Professor of Rhetoric a copy of his oration for preservation in the University Library.

In 1904 the speakers appointed were

ALBERT BENJAMIN WEST,
MORRIS BRAUN

RALPH HERVEY BEVAN
ARTHUR UPHAM POPE

FINAL HONORS were awarded in 1904, under the conditions announced on page 131, to members of the Senior Class, as follows:

RALPH HERVEY BEVAN,

Roman Literature and History.

MORITZ BRAUN,

Greek Literature and History, Roman Literature and History,
Philosophy, Biblical Literature and History.

BERTRAM HARRINGTON BUXTON,
Chemistry.

GUY BLANDIN COLBURN,

The Women's College in Brown University

ORGANIZATION OF THE WOMEN'S COLLEGE

Instruction for undergraduate women* is provided by a department of the University known as the Women's College in Brown University. The aim of this College is to offer to all properly prepared women precisely the same examinations, the same courses of study, under the same teachers, and the same degrees that the University offers to men, but to preserve the distinct social life of a separate college.

The Women's College has a separate recitation hall, known as Pembroke Hall, situated a quarter of a mile from the other University buildings. It is named after Pembroke College, Cambridge, England, the college of Roger Williams. It is of red brick with stone and terra cotta trimmings, after the old English University style of the fifteenth and sixteenth centuries. The building is three stories high, and is fitted up with every convenience. On the first floor are the offices, a private room for the instructors, and three recitation rooms with a seating capacity of fifty-four in the smallest and seventy-nine in the largest. On the second floor are two recitation rooms, a reception room, a study and library combined, thirty by twenty-six feet, and a magazine and reading room, eighteen by twenty-six feet. The third floor is one large hall, seventy-six by forty-four feet, with open-timbered roof and two large fire-places, and on the south side a platform. In the basement, which is light, dry and airy, the students' lockers, baths, kitchen, and lunch room are located. The resources of this building are supplemented by the various University libraries, laboratories, and museums.

The Corporation of the University assumes supervision and control of the Women's College as of other departments of the University and for this purpose appoints annually an Executive Committee of the Women's College. For 1904-05 this committee consists of the following members: The PRESIDENT, the DEAN, R. H. I. GODDARD, A. M., the Rev. HENRY M. KING, D. D., STEPHEN O. METCALF, A. B.

The Corporation receives gifts of money to found scholarships, fellowships, and professorships in Brown University for the benefit of its women

students, and for the general purposes of the Women's College, and holds and administers such funds as separate and distinct from the general funds of the University. All gifts, legacies, and bequests for the Women's College, like those meant for any other department of the University, should be made payable to "Brown University, in Providence, in the State of Rhode Island and Providence Plantations."

The President of the University is charged with the general direction, supervision, and government of this College as of other departments of the University. The immediate direction, supervision, and control is devolved, subject to the direction of the President, on the Dean of the Women's College. An Advisory Council, appointed under the authority of the Corporation, advises with the President and with the Dean upon matters relating to the Women's College, and makes recommendations to the Executive Committee of the Women's College or to the Corporation. The council is composed of the following members: MISS SARAH E. DOYLE, MISS AMELIA S. KNIGHT, MRS. ELIZA G. RADEKE, *MRS. A. I. C. D. AMES, MRS. ANNIE HOWES BARUS.

The Faculty of the Women's College is composed of the heads of all departments of instruction in Brown University, together with all professors and instructors who are actually teaching in the College.

REQUIREMENTS FOR ADMISSION

The requirements for admission to the Women's College are the same that the University prescribes for men; and the entrance examinations for women are held at the same times and places and under the same conditions as those for men. In place of entrance examinations, certificates may be presented from duly authorized schools. For full information on all these points, see pages 37-49.

DEGREES

The requirements for the various degrees are the same for women as for men. Information regarding these requirements may be found on pages 53-63. Upon students of the Women's College who complete satisfactorily the work leading to the degree of A. B., Ph. B., or Sc. B., the Corporation of the University confers the appropriate degree.

Special students who satisfactorily complete any University course receive certificates of their attainments.

COURSES OF INSTRUCTION

In all the required studies classes are formed which are taught by the professors and instructors who have in charge the corresponding classes of men. The elective courses offered are identical in character with

*Deceased.

the corresponding courses offered to men. A list of those offered during the current year may be found in the Annual Announcement of the Women's College. Requests for information should be addressed to the Registrar of the Women's College, Pembroke Hall, Providence.

Students who do not wish to become candidates for a degree are allowed to register as special students on terms similar to those described on page 50. Each applicant for registration as a special student must present to the Dean sufficient evidence of her ability to pursue successfully the courses chosen. Every special student, unless excused by the Dean and by the professors in charge of her subjects, must take the regular examinations in those subjects.

EXAMINATIONS AND REPORTS

As a rule, women take the same examinations as those offered to men, and at the same times and places. When a separate examination is necessary, the two examinations are made as nearly identical in character as possible. Reports of proficiency are given after all examinations.

DEPARTMENTAL HONORS

Departmental honors are awarded to women on the same conditions as to men. The names of women students awarded final honors are printed in the Commencement Program and in the Annual Catalogue of Brown University.

PHYSICAL CULTURE

Great emphasis is laid upon physical training, and a competent teacher gives instruction in this subject throughout the year. Regular exercise with light apparatus is required two hours each week of Freshmen and Sophomores; it is elective for Juniors and Seniors.

DUES

Students at the Women's College pay the same dues as other students of the University. See pages 132-133. No deduction in tuition is made on account of absence. One-half of the tuition and of the incidental expenses is to be paid in advance. The remainder is due January 1st. Laboratory expenses, etc., are to be paid two weeks before the close of a term.

Special students at the Women's College are charged \$10 a term for each course holding three recitations a week. Laboratory charges are in addition to this.

DORMITORY ACCOMMODATIONS

The College owns one dormitory, the Slater Memorial Homestead, which contains four double rooms and nine single rooms. All the rooms are

well furnished. One of the single rooms, on the second floor, is unusually large, and for it and board the charge is \$8.25 a week. Two of the single rooms, on the third floor, are very small, and for each of them and board the charge is \$5.25 a week. For all the other single rooms, and for half of each double room, together with board, the charge is \$6.25 a week. Students are charged with room rent, but not with board, during the vacations which occur in the academic year: the rate is \$2.50 a week for the majority of the rooms; \$4.50 and \$1.50 for the rooms specially mentioned above. Payment for each term must be made in advance.

It is possible for students to obtain rooms very near the Slater Memorial Homestead and take their meals at the dormitory.

Desirable homes for students may also be obtained in private families. Lodgings, with or without board, may be secured on consultation with the Dean.

Each student renting a room in the dormitory must sign a contract therefor in the form given below, on which surety may be demanded, binding her to pay or see paid the rent of the room through the entire year. Where two students rent a room together, each must sign a contract for half the room expenses. This obligation is not impaired by the student's removal from the College, whatever the cause of such removal. The form of contract is given below.

The following is a contract between the Women's College in Brown University, party of the first part, and the undersigned, party of the second part. I hereby engage room No. in Slater Memorial Homestead; the same not to be occupied by any other person without consent of the party of the first part, and I bind myself to pay or cause to be paid to the Dean of the Women's College in Brown University the entire rent, including heat and service, amounting to \$ for the college year beginning September, 190 .

It is a part of this agreement that I shall be held responsible for all damage or defacement of such room or its furniture, ordinary wear excepted; also that disuse of the room by me on account of illness, or in case registration is refused me owing to low standing or bad conduct, does not impair the obligation of this contract.

Signed.....

LOAN FUNDS

The Rhode Island Society for the Collegiate Education of Women has founded a Loan Fund from which students of the Women's College who have completed their first year may borrow small sums on easy terms. This fund is available only for students whose record for scholarship is satisfactory to the committee which administers the loans. Further information may be obtained from the Dean.

SCHOLARSHIPS AND PREMIUMS

The College awards annually from its own funds scholarships of varying amounts to students in need of financial aid. These scholarships are given only to students whose work is creditable, and are withdrawn if their holders become deficient in scholarship or subject in any way to college discipline. Application for scholarships should be made to the Dean. Awards are not made until July first of each year. The Rhode Island Women's Club annually devotes the income of its Churchill Fund toward the payment of the tuition of some worthy student in the Women's College. There are also the following endowed scholarships:

The Sarah E. Doyle Scholarship for young women, of one thousand dollars, founded by the lady whose name it bears, the income to be applied toward the payment of the tuition of students in the Women's College who have been prepared for college in the Providence High School.

The Sarah Sutton Scholarship for young women, of one thousand dollars, founded by one of her daughters.

The Daniels Scholarship of twenty-five hundred dollars, the income to be used toward paying the expenses of one or more women pursuing studies either in the University or in the Woman's College adjunct thereto.

The Howard Scholarship of one thousand dollars presented by James Leland Howard of Hartford, Conn.

The Joseph Thayer Scholarship of sixty-five hundred dollars, the income to be for the education of any young man or woman, who is a resident of the town of Uxbridge, desiring a liberal education.

The Gaspee Chapter Daughters of the American Revolution Prize of forty dollars, offered by the Gaspee Chapter of D. A. R., is paid annually to that student in the graduating class of the Women's College who shall present the best essay upon some topic in American history. The essays are to bear each an assumed name, but to be accompanied by an envelope marked with the assumed name and enclosing the candidate's real name and address. The essays must be handed to the Dean before May 1, 1905. The award is announced on Commencement Day, when the topic for the ensuing year is named. The topic for the year 1903-1904 was "The Treaty of 1783 between Great Britain and the United States." The successful competitor was Florence Butler Beitenman. The topic for the year 1904-1905 will be "The Committees of Correspondence in the New England Colonies."

The students of the Women's College are entitled to compete in all examinations for premiums and prizes offered by Brown University. In case any woman is entitled to a first premium a collateral prize is awarded by the Dean.

Further information in regard to the work of the Women's College may be secured, and catalogues obtained by addressing the Dean.
